Subject Index

R = Commission Report; Asterisk (*) = Nomenclature Report (Recommendations 1998)

000–000 = inclusive page numbers of symposium/conference

(±)-ALPHA-KAINIC ACID AND (–)-ALPHA-KAINIC ACID
Enantioselective total synthesis of (–)-α-kainic acid 259
24-(*R*)-ETHYL-1ALPHA-HYDROXYVITAMIN D3
Synthesis of novel vitamin D analogs 373
2-CHLORO-N-(2,4-DIMETHYL-3-THIENYL)-N-(2-METHOXY-1-METHYLETHYL) ACETAMIDE
The thiophene connection 345
3-HYDROXY-2,4-DIMETHYLTHIOPHENE
The thiophene connection 345
3-SUBSTITUTED BINAPHTHOLS
Chiral tridentate ligands based on 3-substituted binapthols and derived complex hydrides of aluminium 415
AAL-TOXIN/FUMONISIN
Complete structure of maitotoxin 339
AB INITIO calculations
Guidelines for presentation of methodological choices in the publication of computational results—A. *Ab initio* electronic structure calculations 1015R
ABIOTIC FACTORS
Monitoring eutrophication and pollution in estuarine environments—focusing on the use of benthic communities 2313
ABSORPTION EQUILIBRIUM
Clouds and pollution 1345
ACETOGENIN SYNTHESIS
Metal-oxo induced syn-oxidative polycyclizations of hydroxypolyenes: Biomimetic synthesis of polycyclic ether natural products 355
ACETONITRILE EXTRACTION OF COPPER(II)
Ion-pair extraction of metalloporphyrins into a mixture of acetonitrile with water 1925
ACETYLENOSACCHARIDES
An approach to the synthesis of polysaccharide analogues 425
ACID-BASE PROPERTIES OF GUANINE DERIVATIVES
The effects of N7-coordinated cis-diammine-platinum(II) on the acid-base properties of guanine derivatives 845
ACIDITY CONSTANTS FOR PLATINUM(II) COMPLEXES
The effects of N7-coordinated cis-diammine-platinum(II) on the acid-base properties of guanine derivatives 845
ACTINOMYCETES
Studies directed toward the synthesis of Vancomycin and related cyclic peptides 391
ACTIONMETRY
Process control of organosilicon plasmas for barrier film preparations 1203
ACTIVATED SLUDGE WASTEWATER TREATMENT SYSTEMS
Factors influencing biodegradation of synthetic organic chemicals in natural and engineered aquatic environments 1363
ACTIVATION BARRIERS FOR ORGANIC REACTIONS
Intrinsic barriers to the formation and reaction of carbocations 2007
ACTIVE ENZYME RADICAL-COPPER COMPLEX
Radical copper oxidases, one electron at a time 903
ACYCLOVIR
Practical syntheses of antiviral nucleosides 313
ADAPTIVE POLYMORPHISM
Biodiversity and intraspecific genetic variation 2079
ADDUCT FORMATION
Tailoring molecular assemblies for metal ion bending 2345
ADENINE DERIVATIVE INHIBITORS
Structure-based inhibitor design for CDK2, a cell cycle controlling protein kinase 555
ADENOSINE DIPHOSPHATE (ADP)
A thermodynamic principle for the coupled bioenergetic processes of ATP synthesis 639
Mimicking bacterial photosynthesis 2189
ADENOSINE TRIPHOSPHATE (ATP)
A thermodynamic principle for the coupled bioenergetic processes of ATP synthesis 639
Mimicking bacterial photosynthesis 2189
ADIABATIC LOW TEMPERATURE CALORIMETRY
Low temperature thermal properties of amorphous materials 599
ADSORPTION EQUILIBRIA
Interfacial adsorption and complexation in liquid–liquid extraction systems 1889
ADVANCED CERAMIC MATERIALS
Enhancing materials design capability through understanding multicomponent phase relationships 509
AEROSOL PARTICLES
Clouds and pollution 1345
AGGREGATE SYSTEMS
Reactivity and selectivity in aggregate systems 1961
AGRICULTURAL BIOMASS PRODUCTION
Calorimetry of plant metabolism: A means to rapidly increase agricultural biomass production 687
AGROCHEMICAL INDUSTRY
Advanced oxidation processes applied to effluent streams from an agrochemical industry 2271
AIDS
Studies directed toward anti-HIV compounds 303
AIR POLLUTION
Performance and results of a six-year German/Brazilian research project in the industrial area of Cubatão/SP Brazil 2287
Cultural heritage and the environment 2327
AIRWAY RESTRICTION
Design of inhibitors of leukotriene biosynthesis and their therapeutic potential 271
ALCOHOL–WATER MIXTURES AS SOLVENT
Thermal unfolding of hen egg-white lysozyme in the presence of 4-chlorobutan-1-ol 665
ALDOL REACTIONS
Asymmetric synthesis using palladium catalysts 411
Asymmetric catalysis with chiral Lewis bases 1469
Designer Lewis acids for selective organic synthesis 1507
ALKAPLANE
The planar carbon story 1977
ALKENE EPOXIDATION AND DIHYDROXYLATION
The application of nitrido manganese reagents to the synthesis of protected N-methyl D-fucosamine 1097
ALKYLATION
Practical syntheses of antiviral nucleosides 313
ALKYLPHENOL ETHOXYLATES (APEOS)
Neurotransmitters and the control of hypophyseal gonadal functions: possible implications of endocrine disruptors 1647
Structure/activity relationships 1725
ALLOSTERIC ENZYMES
Yeast chorismate and other allosteric enzymes 527
ALLYL(ORGANO) PALLADIUM COMPLEXES
New transformations of unsaturated hydrocarbon ligands coordinated with mono- and dinuclear palladium units 1105
ALUMINUM HYDRIDES
Chiral tridentate ligands based on 3-substituted binapthols and derived complex hydrides of aluminium 415
ALUMINUM PORPHYRIN-STILBAZOLE SYSTEM
A photoresponsive molecular switch. Reaction of CO_2 and epoxide regulated by an aluminum porphyrin–stilbazole system 2365
AMIDE-LITHIUM AMIDE
The role of complexes in defining organometallic reaction mechanisms 1939
AMIDOFERROCENE DENDRIMERS
Redox-active organotransition-metal dendrimers: The dendritic effect in supramolecular recognition 809
AMINO ACIDS
Binding biomolecules with designed, hydrogen-bonding receptors 2371

© 1998 IUPAC

AMINO FUNCTIONAL GROUPS
An overview on the solution thermodynamics of lower rim functionalised calixarene derivatives and metal cations. New derivatives containing amino and thioalkyl functional groups 769
AMPHILIC BLOCK COPOLYMERS
Synthesis and characterization of polyurethane microspheres 1295
AMPHOTERICIN B
Fermentation-derived compounds as a source of new products 335
ANAEROBIC BIODEGRADATION PRODUCTS
Computer-assisted evaluation of anaerobic biodegradation products 1385
ANALYSIS OF DEGRADATION PROCESSES
Cultural heritage and the environment 2327
ANALYTICAL REFERENCE MATERIALS
Environmental endocrine disruptors 2319
ANDROGEN/OESTROGEN ACTION
Environmental oestrogens and male infertility 1685
ANGIOSPERM MACROPHYLOGENY
Natural products and evolutionary ecology 299
ANIONIC-NONANIONIC SURFACTANT MIXTURES
Thermodynamics of adsorption of surfactants at solid–liquid interface 621
ANISOTROPY
Poly(ethylene glycol) block copolymers by redox process: Kinetics, synthesis and characterization 1245
Photoinduced manipulations of photochromes in polymers: Anisotropy, modulation of the NLO properties and creation of surface gratings 2157
ANODIC POLYMERIZATION
Anodic generation of new ionophoric conducting polymers 1253
ANTENNA CHLOROPHYLL
Transport of excitation energy in thylakoid disc in chloroplast at normal temperature 651
ANTENNA CHROMOPHORES
Mimicking bacterial photosynthesis 2189
ANTHERIDIOGENS
Synthetics and structural studies on novel gibberellins 351
ANTHRANILATE
Yeast chorismate and other allosteric enzymes 527
ANTHROPOGENIC ENVIRONMENTAL OESTROGENS
Natural and Anthropogenic Environmental Oestrogens—an issue of special reports 1617
ANTI-ADHESION THERAPY
Ganglioside research: New trends and reflections 533
ANTIANAPHYLAXIS AGENTS
Recent results on structural chemistry of new natural products from Chinese herbal medicine 431
ANTIBACTERIAL ACTIVITY
Biological activities of some Turkish medicinal plants 403
ANTIBODY MiMICS
Studies in biomimetic chemistry 267
ANTICANCER AGENTS
Synthesis of novel vitamin D analogs 373
Recent results on structural chemistry of new natural products from Chinese herbal medicine 431
Studies on the syntheses and biological activities of isonucleosides 435
Biodiversity and natural product drug discovery 2065
ANTICANCER ANTIBIOTIC COMPLEXES
Complexes of lopsided N-donor heterocyclic bioligands: Has the electrostatic effect of the N_2CH proton been overlooked in metallobiochemistry? 961
ANTICANCER DRUG DELIVERY
New concepts in controlled drug delivery 1283
ANTIDOTE AGENTS
Recent results on structural chemistry of new natural products from Chinese herbal medicine 431
ANTIFERROMAGNETICALLY COUPLED SPINS
Studies of the electronic structure of polyradicals by means of their magnetic properties 1953
ANTIFUNGAL ACTIVITY
New natural products from medicinal plants of Pakistan 385
Recent results on structural chemistry of new natural products from Chinese herbal medicine 431
ANTI-HIV
Studies directed toward anti-HIV compounds 303
Studies on the syntheses and biological activities of isonucleosides 435
Recent developments in the chemotherapy of HIV infections 567
ANTIINFLAMMATORY ACTIVITY TESTS
Recent results on structural chemistry of new natural products from Chinese herbal medicine 431
ANTI-MARKOVNIKOV ADDITION
An asymmetric induction principle and biomimetics with photons via electron transfer 2167
ANTIMICROBIAL ACTIVITY
Lantibiotics and microcins: novel posttranslational modifications of polypeptides 97
Biological activities of some Turkish medicinal plants 403
ANTISENSE COMPOUNDS
Development of artificial ribonucleases 111
ANTITUBERCULAR ACTIVITY
A search for novel chemotherapy against tuberculosis amongst natural products 365
ANTITUMOR AGENTS
Recent results on structural chemistry of new natural products from Chinese herbal medicine 431
The effects of N7-coordinated cis-diammine-platinum(II) on the acid-base properties of guanine derivatives 845
Creating regular arrangements of nucleobases through metal ion coordination and H bond formation 977
ANTITUMOR ANTIBIOTICS
Interaction of bleomycin with DNA 307
ANTIVIRAL ACTIVITIES
Recent results on structural chemistry of new natural products from Chinese herbal medicine 431
Studies on the syntheses and biological activities of isonucleosides 435
ANTIVIRAL NUCLEOSIDES
Practical syntheses of antiviral nucleosides 313
APROTIC SOLVENTS
Solubility problems relating to lithium battery electrolytes 1905
ARC AS CONVECTIVE AND RADIATIVE HEAT SOURCE
Thermal plasma process development in Norway 1223
ARC-CATHODE INTERACTIONS
Cold cathode arc attachment: The importance of the high local pressure 1175
AROMATIC ORTHODIETHERS
Anodic generation of new ionophoric conducting polymers 1253
AROMATIC POLYAMIDES
Poly(ethylene glycol) block copolymers by redox process: Kinetics, synthesis and characterization 1245
AROMATIC POLYESTERS
Star shaped and hyperbranched aromatic polyesters 1235
ARRHENIUS PLOT
Thermodynamic and kinetic parameters from isothermal heat conduction microcalorimetry 633
ARTEMESIA
Recent results on structural chemistry of new natural products from Chinese herbal medicine 431
ARTHOPLASTIC APPLICATIONS
New concepts in controlled drug delivery 1283
ARTIFICIAL ENZYMES
Studies in biomimetic chemistry 267
ARTIFICIAL RECEPTORS
Binding biomolecules with designed, hydrogen-bonding receptors 2371
ARYLOXYPHENOXYPROPIONATES
Utilization of structure–property relationships as a guide for achievement of high optical purity in aryloxyphenoxypropionates 325
ASPAPRAGINE-LINKED GLYCOSYLATION
The conformational basis of asparagine-linked glycosylation 33
ASPARTATE TRANSCARBAMYLASE
Yeast chorismate and other allosteric enzymes 527
ASSAY VALIDATION
Issues associated with the validation of *in vitro* and *in vivo* methods for assessing endocrine disrupting chemicals 1735
ASSESSMENT OF DEGRADATION PROCESSES
Cultural heritage and the environment 2327
ASSOCIATION REACTIONS
Wide-temperature range observations on reactions of metal atoms and small radicals 469
ASTHMA
Design of inhibitors of leukotriene biosynthesis and their therapeutic potential 271
ASYMMETRIC CATALYSIS
New catalysts and methods for highly enantioselective metal carbene reactions 1123
Asymmetric catalysis with chiral Lewis bases 1469

© 1998 IUPAC

Some aspects of asymmetric catalysis with chiral ferrocenyl ligands 1477
ASYMMETRIC CYCLOADDITION
New types of Lewis acids used in organic synthesis 1019
ASYMMETRIC INDUCTION
Chiral relay auxiliaries 1501
An asymmetric induction principle and biomimetics with photons via electron transfer 2167
ASYMMETRIC REDUCTIVE RING OPENING
Metal catalyzed hydrometalations and their applications in synthesis 1059
ASYMMETRIC SYNTHESIS
Asymmetric synthesis using palladium catalysts 411
ATMOSPHERIC CHEMISTRY
How the atmosphere keeps itself clean and how this is affected by human activities 1319
Gas-phase degradation of organic compounds in the troposphere 1327
Clouds and pollution 1345
Computational chemistry as an analytical tool: thermochemical examples in atmospheric chemistry 2301
ATMOSPHERIC CIRCULATION AND MASS TRANSPORT
Performance and results of a six-year German/Brazilian research project in the industrial area of Cubatão/SP Brazil 2287
ATMOSPHERIC PARTICULATE MATTER
Heterogeneous processes involving atmospheric particulate matter 1353
ATMOSPHERIC POLLUTANTS
Clouds and pollution 1345
ATMOSPHERIC REACTIONS
Product studies of gas-phase reactions of organic compounds 1335
ATMOSPHERIC-PRESSURE PLASMAS
Thermal plasma synthesis of diamond 485
ATOMIC ABSORPTION SPECTROSCOPY
Toxic trace metal speciation: importance and tools for environmental and biological analysis 2281
ATOMIC FORCE MICROSCOPY
Studies in biomimetic chemistry 267
Supramolecular chemistry at interfaces 1985
ATOMIC-WEIGHT VALUES
History of the recommended atomic-weight values from 1882 to 1997: A comparison of differences from current values to the estimated uncertainties of earlier values 237R
ATOMSPHERIC GASES
How the atmosphere keeps itself clean and how this is affected by human activities 1319
ATP SYNTHESIS
A thermodynamic principle for the coupled bioenergetic processes of ATP synthesis 639
Mimicking bacterial photosynthesis 2189
AUGER SPECTROSCOPY
Plasma–surface interactions in the processing of III–V semiconductor materials 1181
AUTOCLEAVAGE
Protein splicing: a novel form of gene expression and paradigm for self-catalyzed protein rearrangements 1
AUTOMATED METHODS OF ANALYSIS
New challenges in environmental chemistry 2259
AUTOPHOSPHORYLATION
A structural view of ligand binding to the retinoid receptors 41
AVERMECTIN
Fermentation-derived compounds as a source of new products 335
AZOBENZENE
Photoinduced manipulations of photochromes in polymers: Anisotropy, modulation of the NLO properties and creation of surface gratings 2157
Interfacial photochemistry: fundamental and applications 2177
AZT
Studies directed toward anti-HIV compounds 303
BARRIER FILM PREPAPRATIONS
Process control of organosilicon plasmas for barrier film preparations 1203
BASIC FIBROBLAST GROWTH FACTOR
Biodegradable hydrogels for bone regeneration through growth factor release 1277
BENTHIC COMMUNITIES
Monitoring eutrophication and pollution in estuarine environments—focusing on the use of benthic communities 2313
BERBERINE
A search for novel chemotherapy against tuberculosis amongst natural products 365
BERGMAN CYCLISATION
An approach to the synthesis of polysaccharide analogues 425
BETA-THYMIDINE
Studies directed toward anti-HIV compounds 303
BICYCLOBUTONIUM IONS
Recent advances in the experimental and computational characterization of carbocations: silyl effects in bicyclobutonium ions 2015
BIDENTATE BRIDGING LIGANDS
Copper(I) halide supramolecular networks linked by N-heterocyclic donor bridging ligands 2351
BINAPHTHOL DERIVATIVES
Chiral tridentate ligands based on 3-substituted binapthols and derived complex hydrides of aluminium 415
BINAP-SILVER(I)-CATALYZED ASYMMETRIC REACTIONS
Designer Lewis acids for selective organic synthesis 1507
BINARY PHASE DIAGRAMS
Nomenclature for phase diagrams with particular reference to vapour–liquid and liquid–liquid equilibria 2233R
BINDING BIOMOLECULES
Binding biomolecules with designed, hydrogen-bonding receptors 2371
BINDING OF CHITOOLIGOSACCHARIDES TO CIA
Elucidation of the combining site of Coccinia indica agglutinin by thermodynamic analyses of its ligand binding 677
BIOACCUMUJLATION
Health risk assessment due to wastewater use in agriculture 2295
Environmental endocrine disruptors 2319
BIOACTIVE MOLECULES
Chemistry of photoproteins as interface between bioactive molecules and protein function 2085
BIOASSAYS
New challenges in environmental chemistry 2259
BIOAVAILABILITY
Computer modelling of microbial hydrolytic dehalogenation 1375
BIOCATALYSIS
Complexes of lopsided N-donor heterocyclic bioligands: Has the electrostatic effect of the N_2CH proton been overlooked in metallobiochemistry? 961
BIOCIDES
Environmental endocrine disruptors 2319
BIOCORROSION OF STRUCTURAL MATERIALS
Interfacial phenomena in biocorrosion 627
BIODEGRADABLE HYDROGELS
Biodegradable hydrogels for bone regeneration through growth factor release 1277
BIODEGRADABLE SYNTHETIC POLYMERS
New concepts in controlled drug delivery 1283
BIODEGRADATION
New concepts in controlled drug delivery 1283
Factors influencing biodegradation of synthetic organic chemicals in natural and engineered aquatic environments 1363
Computer modelling of microbial hydrolytic dehalogenation 1375
Computer-assisted evaluation of anaerobic biodegradation products 1385
BIODETERIORATION OF STONE
Cultural heritage and the environment 2327
BIODIVERSITY
Biodiversity and natural product drug discovery 2065
Biodiversity research and training program in Thailand 2073
Biodiversity and intraspecific genetic variation 2079
Biodiversity, biotechnology and agriculture 2101
BIOFILMS
Interfacial phenomena in biocorrosion 627
BIOIFILM/PASSIVE LAYER INTERACTIONS
Interfacial phenomena in biocorrosion 627
BIOINORGANIC SCIENCE
Toxic trace metal speciation: importance and tools for environmental and biological analysis 2281
BIOLOGICAL ACTIVITIES OF ISONUCLEOSIDES
Studies on the syntheses and biological activities of isonucleosides 435
BIOLOGICAL CALORIMETRY
Monitoring metabolic activities of small animals by means of microcalorimetry 695
BIOLOGICAL ELECTRON TRANSFER REACTIONS
Dynamic effects in long-distance biological electron transfer reactions 2201
BIOLOGICAL MEMBRANES
Modulation of membrane structure and function by hydrophobic mismatch between proteins and lipids 75

© 1998 IUPAC

BIOLOGICAL OLIGOSACCHARIDES
Molecular delivery systems using macrocyclic sugar clusters 2379
BIOLOGICAL SUGAR-RECEPTOR INTERACTIONS
Molecular delivery systems using macrocyclic sugar clusters 2379
BIOLUMINESCENCE
Chemistry of photoproteins as interface between bioactive molecules and protein function 2085
BIOMASS
How the atmosphere keeps itself clean and how this is affected by human activities 1319
Factors influencing biodegradation of synthetic organic chemicals in natural and engineered aquatic environments 1363
BIOMIMETIC CHEMISTRY
Studies in biomimetic chemistry 267
Metal-oxo induced syn-oxidative polycyclizations of hydroxypolyenes: Biomimetic synthesis of polycyclic ether natural products 355
An asymmetric induction principle and biomimetics with photons via electron transfer 2167
BIOPHORES
Computer-assisted evaluation of anaerobic biodegradation products 1385
BIOSENSORS
Conducting polymers for biosensors: Rationale based on models 1259
BIOSIGNALING
Cell regulatory function of glycophingolipids: carbohydrate recognition and biosignaling 49
BIOSYNTHESIS
Sugar mimics from sugar lactones 279
Comparative reproductive physiology of non-mammalian species 1657
A photoresponsive molecular switch. Reaction of CO_2 and epoxide regulated by an aluminum porphyrin–stilbazole system 2365
BIOTECHNOLOGY
Protein splicing: a novel form of gene expression and paradigm for self-catalyzed protein rearrangements 1
Cell regulatory function of glycophingolipids: carbohydrate recognition and biosignaling 49
Acylated chitooligomers are molecular signals that mediate the symbiotic interactions between nitrogen-fixing bacteria and their host plants 55
Plants as a factory to produce molecules 61, Liposomes: from membrane models to gene therapy 89
Lantibiotics and microcins: novel posttranslational modifications of polypeptides 97
Biotechnology and synthetic chemistry—routes to clinically important compounds 2093
Biodiversity, biotechnology and agriculture 2101
BIOTIC AND ABIOTIC RESOURCE BASE OF AGRICULTURE
Biodiversity, biotechnology and agriculture 2101
BIOTIN SYNTHASE
Novel roles for Fe-S clusters in stabilizing or generating radical intermediates 939
BIREFRINGENCE
Photoinduced manipulations of photochromes in polymers: Anisotropy, modulation of the NLO properties and creation of surface gratings 2157
BISMELAMINE CALIX[4]ARENES
Non-covalent synthesis of organic nanostructures 1459
BISMUTH ANTIULCER DRUGS
Metal complexes in medicine: Design and mechanism of action 863
BISPHENOL A
Metabolism and fate of xenoestrogens in man 1747
BISTABILITY IN CLOSED SYSTEMS
Nonlinear dynamics in closed biological and chemical systems 645
BLENOXANE
Interaction of bleomycin with DNA 307
BLEOMYCIN
Interaction of bleomycin with DNA 307, New concepts in controlled drug delivery 1283
BLOCK COPOLYMERS
Preparation and structure of polyether-block containing polymers Preparation and structure of polyether-block containing polymers 1239
Poly(ethylene glycol) block copolymers by redox process: Kinetics, synthesis and characterization 1245
BLOCK OR GRAFT COPOLYMERS
Reactively compatibilized polymer blends: Interfacial chemical reactions during melt-extrusion 1289
BLUE COPPER
Electronic structure contributions to function in bioorganic chemistry: The blue copper active site 799
Stereo- and site selection by enantiomers in electron-transfer reactions involving native and recombinant metalloproteins 985
BOLAAMPHIPHILES ("BOLA")
Rigidity in synkinetic molecular monolayers of functional lipids containing Ångstrom Gaps 2385
BOND CLEAVAGE
Coenzyme B6 dependent novel bond cleavage reactions 9
BONE REGENERATION
Biodegradable hydrogels for bone regeneration through growth factor release 1277
BOROSILICATE GLASS
High temperature oxidation of ceramic matrix composites 493
BOSON PEAKS
Low temperature thermal properties of amorphous materials 599
BOUND XENOBIOTIC RESIDUES
Pesticides report 40: Bound xenobiotic residues in food commodities of plant and animal origin 1423R
BOUNDARY LAYER THICKNESS
Thermal plasma synthesis of diamond 485
BOWEL CANCER
Dietary phyto-oestrogens and cancer 1777
BRAIN-GANGLIOSIDES
Ganglioside research: New trends and reflections 533
BRANCHED ARCHITECTURES
Suprasupermolecular chemistry: the chemistry within the dendrimer 2337
BREAST CANCER
Natural and Anthropogenic Environmental Oestrogens—an issue of special reports 1617
Breast cancer: evidence for xeno-oestrogen involvement in altering its incidence and risk 1713
Dietary phyto-oestrogens and cancer 1777
BREVETOXIN-PORPHYRIN CONJUGATES
Solving challenging bioorganic problems by exciton coupled CD 377
BRIDGED CLUSTER ASSEMBLIES
[1:3] Site-differentiated and sulfide-bridged cubane clusters in chemistry and biology 931
BRIDGED FUSED RING SYSTEMS
Nomenclature of fused and bridged fused ring systems 143*
BRONSTED RELATION
Kinetics of proton transfer reactions involving carbon 2221
BRYOSTATIN ANALOGS
The chemistry–medicine continuum: Synthetic, computer, spectroscopic and biological studies on new chemotherapeutic leads 539
CALCEMIC ACTIVITY
Synthesis of novel vitamin D analogs 373
CALIBRATION
Guidelines for calibration in analytical chemistry—Part I. Fundamentals and single component calibration 993R
CALIX[4]ARENES
Supramolecular chemistry at interfaces 1985
CALIX[4]PYRROLE CONJUGATES
Functionalized calix[4]pyrroles 2401
CALIXARENE DERIVATIVES
An overview on the solution thermodynamics of lower rim functionalised calixarene derivatives and metal cations. New derivatives containing amino and thioalkyl functional groups 769
CALORIMETRIC INVESTIGATIONS
Low temperature thermal properties of amorphous materials 599
Thermodynamics of adsorption of surfactants at solid–liquid interface 621
Calorimetry of plant metabolism: A means to rapidly increase agricultural biomass production 687
Monitoring metabolic activities of small animals by means of microcalorimetry 695
CALORIMETRY OF PLANT METABOLISM
Calorimetry of plant metabolism: A means to rapidly increase agricultural biomass production 687
CANCER THERAPY
Complexes of lopsided N-donor heterocyclic bioligands: Has the electrostatic effect of the N_2CH proton been overlooked in metallobiochemistry? 961
CAPACITIVELY COUPLED PLASMA
Phasespace modelling of a radiofrequency plasma interacting with surfaces 1187

© 1998 IUPAC

CAPILLARY RHEOMETRY
Rheological and mechanical properties of poly(α-methylstyrene-co-acrylonitrile)/poly(methyl methacrylate) blends in miscible and phase separated regimes of various morphologies 1547R
CARBENIUM IONS
Production of carbenium ions from carbenes by protonation 2031
CARBOCATIONS
Intrinsic barriers to the formation and reaction of carbocations 2007
Recent advances in the experimental and computational characterization of carbocations: silyl effects in bicyclobutonium ions 2015
CARBOCYCLE SYNTHESIS
Carbohydrates to densely functionalized carbocycles: 'armed and disarmed' effects in an approach to tetrodotoxin 285
CARBODICATIONS
Investigations on intriguing long lived carbocations 2001
CARBOHYDRATE GLYCALS
The application of nitrido manganese reagents to the synthesis of protected N-methyl D-fucosamine 1097
CARBOHYDRATE MIMICS
Sugar mimics from sugar lactones 279
CARBOHYDRATE–PROTEIN INTERACTIONS
Cell regulatory function of glycophingolipids: carbohydrate recognition and biosignaling 49
CARBON DIOXIDE
How the atmosphere keeps itself clean and how this is affected by human activities 1319
CARBON MONOOXIDE DEHYDROGENASE
[1:3] Site-differentiated and sulfide-bridged cubane clusters in chemistry and biology 931
CARBONATE SOLUBILITIES
Solubilities of metal carbonates 1913
CARBONYL COUPLING REACTIONS
Low-valent transition metal induced C–C-bond formations: Stoichiometric reactions evolving into catalytic processes 1071
CARBOSTANNYLATION OF CARBON–CARBON TRIPLE BONDS
Direct vinylation reactions of phenols 1091
CARCINOGENICITY
Breast cancer: evidence for xeno-oestrogen involvement in altering its incidence and risk 1713
CASCADE CYCLIZATIONS
An asymmetric induction principle and biomimetics with photons via electron transfer 2167
CASCADE PROCESSES
Heterocycles via Pd catalysed molecular queuing processes. Relay switches and the maximisation of molecular complexity 1047
CASSCF AND CASPT2
Retro-cycloadditions and sigmatropic shifts: the C_7H_8 and C_7H_{10} potential energy surfaces 1947
CATALYSIS
Protein splicing: a novel form of gene expression and paradigm for self-catalyzed protein rearrangements 1
Coenzyme B6 dependent novel bond cleavage reactions 9
Visualising enzyme and ribozyme intermediates using fast diffraction and reaction trapping methods 17
Structural bases for the catalytic mechanism of NiFe hydrogenase 25
Advanced oxidation processes applied to effluent streams from an agrochemical industry 2271
CATALYSIS ASYMMETRIC REACTIONS
Heterobimetallic asymmetric catalysts. Developments and applications 1027
CATALYTIC ASYMMETRIC HYDROAMINATION OF OLEFINS
Some aspects of asymmetric catalysis with chiral ferrocenyl ligands 1477
CATALYTIC ENANTIOSELECTIVE MANNICH-TYPE REACTIONS
New types of Lewis acids used in organic synthesis 1019
CATALYTIC PROCESES
Low-valent transition metal induced C–C-bond formations: Stoichiometric reactions evolving into catalytic processes 1071
CATALYTIC SYNTHESIS OF VINYLCARBAMATES
Smart ruthenium catalysts for the selective catalytic transformations of alkynes 1065
CATENANES
Concept transfer from the life sciences into materials science 419
CATHODE EROSION
Cold cathode arc attachment: The importance of the high local pressure 1175
C-DISACCHARIDES
Chemical synthesis of oligosaccharide mimetics 407
Recent advances in the synthesis of carbohydrate mimics 1495
CDK-ACTIVATING KINASE
Structure-based inhibitor design for CDK2, a cell cycle controlling protein kinase 555
CELL ADHESION
Cell regulatory function of glycophingolipids: carbohydrate recognition and biosignaling 49
CELL FREE EXTRACTS OF YEAST
Nonlinear dynamics in closed biological and chemical systems 645
CELL GROWTH FACTORS
Biodegradable hydrogels for bone regeneration through growth factor release 1277
CELL PROLIFERATION ASSAYS
Review of suggested testing methods for endocrine-disrupting chemicals 1805
CELLOBIOSE
An approach to the synthesis of polysaccharide analogues 425
CELLULAR DIFFERENTIATION
Synthesis of novel vitamin D analogs 373
CERAMIC FILM SYNTHESIS ON METALLIC SUBSTRATES
Synthesis of ceramic films on metallic substrates using magnetron-sputtering deposition synchro-enhanced by microwave ECR plasma source ion implantation under high vacuum conditions 1199
CERAMIC MATRIX COMPOSITES (CMCS)
High temperature oxidation of ceramic matrix composites 493
CERTIFIED MATERIALS AND STANDARDS
New challenges in environmental chemistry 2259
C-GLYCOSIDE SYNTHESIS
Chemical synthesis of oligosaccharide mimetics 407
CHAIN DISRUPTORS
Poly(ethylene glycol) block copolymers by redox process: Kinetics, synthesis and characterization 1245
CHAIN-MOLECULE SOLUTIONS
Critical phenomena of chain-molecule solutions 609
CHALCOGENIDE CHEMISTRY
Transition metal sulfur chemistry and its relevance to molybdenum and tungsten enzymes 889
CHANNELLED INORGANIC COORDINATION POLYMERS
Copper(I) halide supramolecular networks linked by N-heterocyclic donor bridging ligands 2351
CHARGED BIOMACROMOLECULES
Biodegradable hydrogels for bone regeneration through growth factor release 1277
CHEMICAL POTENTIAL DIAGRAMS
Interfacial microchemistry: reactions in inorganic systems 501
CHEMICAL SHIFT ASSIGNMENTS
Recommendations for the presentation of NMR structures of proteins and nucleic acids 117*
CHEMICAL SPECIATION
Toxic trace metal speciation: importance and tools for environmental and biological analysis 2281
CHEMICAL TRAPPING
Visualising enzyme and ribozyme intermediates using fast diffraction and reaction trapping methods 17
CHEMICAL VAPOR DEPOSITION
Simulation of surface reactions 477
High rate deposition of thick epitaxial films by thermal plasma flash evaporation 1193
CHEMICALS IN THE ENVIRONMENT
New challenges in environmental chemistry 2259
CHEMISORPTION-ADSORPTION
Simulation of surface reactions 477
CHEMISTRY AND TRANSPORT MODELS
Heterogeneous processes involving atmospheric particulate matter 1353
CHEMO- AND ENANTIOSELECTIVITY
Metal-catalyzed asymmetric hetero-Diels–Alder reactions of unactivated dienes with glyoxylates 1117
CHEMOSELECTIVE TRANSFORMATIONS
Carbohydrates to densely functionalized carbocycles: 'armed and disarmed' effects in an approach to tetrodotoxin 285
CHEMOSELECTIVITY
Heterocycles via Pd catalysed molecular queuing processes. Relay switches and the maximisation of molecular complexity 1047
CHEMOSENSORS FOR BIOLOGICAL SYSTEMS
Binding biomolecules with designed, hydrogen-bonding receptors 2371
CHEMOTHERAPEUTIC AGENTS
The chemistry–medicine continuum: Synthetic, computer, spectroscopic and biological studies on new chemotherapeutic leads 539
Biodiversity and natural product drug discovery 2065

© 1998 IUPAC

CHEMOTHERAPY
A search for novel chemotherapy against tuberculosis amongst natural products 365
Recent developments in the chemotherapy of HIV infections 567
CHINESE HERBAL MEDICINE
Recent results on structural chemistry of new natural products from Chinese herbal medicine 431
Biologically active components from traditional Chinese medicines 547
CHIRAL ALKYLATING AGENTS
Utilization of structure–property relationships as a guide for achievement of high optical purity in aryloxyphenoxypropionates 325
CHIRAL DIRHODIUM (II) CARBOXAMIDATES
New catalysts and methods for highly enantioselective metal carbene reactions 1123
CHIRAL DRUGS
Solving challenging bioorganic problems by exciton coupled CD 377
CHIRAL FERROCENYL LIGANDS
Some aspects of asymmetric catalysis with chiral ferrocenyl ligands 1477
CHIRAL LEWIS BASES
Asymmetric catalysis with chiral Lewis bases 1469
CHIRAL LIGAND
Reactivity and selectivity in aggregate systems 1961
CHIRAL PALLADIUM (II) ENOLATE
Asymmetric synthesis using palladium catalysts 411
CHIRAL PHOSPHINOOXAZOLINE–TUNGSTEN COMPLEXES
Enantio- and regiocontrol in palladium- and tungsten-catalyzed allylic substitutions 1035
CHIRAL PHOSPHORAMIDE PROMOTERS
Asymmetric catalysis with chiral Lewis bases 1469
CHIRAL PLATFORMS
About the use of molecular workbenches and platforms in organic synthesis 1487
CHIRAL TRIDENTATE LIGANDS
Chiral tridentate ligands based on 3-substituted binapthols and derived complex hydrides of aluminium 415
CHITOOLIGOMERS
Acylated chitooligomers are molecular signals that mediate the symbiotic interactions between nitrogen-fixing bacteria and their host plants 55
CHLORINATED BITHIAZOLES
Interaction of bleomycin with DNA 307
CHOLESTEROL
Studies in biomimetic chemistry 267
CHORISMATE
Yeast chorismate and other allosteric enzymes 527
CHROMIUM CATALYZED REACTIONS
Low-valent transition metal induced C–C-bond formations: Stoichiometric reactions evolving into catalytic processes 1071
CIRCULAR DICHROISM
Solving challenging bioorganic problems by exciton coupled CD 377
Multi-state thermal transitions of proteins—DNA-binding domain of the c-Myb oncoprotein 671
Spectroelectrochemistry: A survey of *in situ* spectroscopic techniques 1395R
CISPLATIN
The effects of N7-coordinated cis-diammine-platinum(II) on the acid–base properties of guanine derivatives 845
CLINICALLY IMPORTANT COMPOUNDS
Biotechnology and synthetic chemistry—routes to clinically important compounds 2093
CLOUDS AND POLLUTION
Clouds and pollution 1345
CLOVER DISEASE
Clover phyto-oestrogens in sheep in Western Australia 1855
CLUSTER GEOMETRIES AND REARRANGEMENTS
Tetrahedral, oxtahedral, cubal and centered cubal dithiolate clusters and cages of Cu(I) and Ag(I) 839
COATINGS
High temperature oxidation of ceramic matrix composites 493
COCCINIA INDICA AGGLUTININ (CIA), COMBINING SITE
Elucidation of the combining site of Coccinia indica agglutinin by thermodynamic analyses of its ligand binding 677
COENZYME B6
Coenzyme B6 dependent novel bond cleavage reactions 9
CO-INCINERATION
High temperature chemical aspects of waste disposal and environmental clean-up 461
COLCHICINE
Biodiversity and natural product drug discovery 2065
COLLAGEN
Mechanism of hydration of urea and guanidium ion: A model study of denaturation of proteins 659
New concepts in controlled drug delivery 1283
COLON AND STOMACH TARGETING
New concepts in controlled drug delivery 1283
COMAMONAS TESTOSTERONII
Interfacial phenomena in biocorrosion 627
COMBINATORIAL CHEMISTRY
The impact of genomics on medicinal chemistry 359
Non-covalent synthesis of organic nanostructures 1459
COMBUSTION PROCESSES
Wide-temperature range observations on reactions of metal atoms and small radicals 469
COMMISSION REPORTS (R = COMMISSION REPORT AND * = IUPAC RECOMMENDATIONS)
Chemistry and Human health Division, Medicinal Chemistry Section 1129–1143*

DIFFERENTIAL SCANNING CALORIMETRY
High temperature chemical aspects of waste disposal and environmental clean-up 461
Thermal unfolding of hen egg-white lysozyme in the presence of 4-chlorobutan-1-ol 665
Multi-state thermal transitions of proteins—DNA-binding domain of the c-Myb oncoprotein 671
Poly(ethylene glycol) block copolymers by redox process: Kinetics, synthesis and characterization 1245
DIFFERENTIAL THERMAL ANALYSIS
High temperature chemical aspects of waste disposal and environmental clean-up 461
DIFFUSION KINETIC APPROACH
Interfacial microchemistry: reactions in inorganic systems 501
DIFFUSION LAYER IMAGING (OR PROFILING)
Spectroelectrochemistry: A survey of *in situ* spectroscopic techniques 1395R
DIFFUSION-CONTROLLED PROCESS
Interfacial microchemistry: reactions in inorganic systems 501
DIIRON (II) COMPLEXES
Reactivity of diiron(II) complexes with molecular oxygen 955
DIMETALLIC COMPLEXES
Metal basicity and cooperative effects in the reactions of dinuclear pyrazolato rhodium complexes 779
DIMETHANOSPIROALKAPLANES
The planar carbon story 1977
DINUCLEAR PALLADIUM ORGANOMETALLIC COMPLEXES
New transformations of unsaturated hydrocarbon ligands coordinated with mono- and dinuclear palladium units 1105
DINUCLEAR PYRAZOLATO RHODIUM COMPLEXES
Metal basicity and cooperative effects in the reactions of dinuclear pyrazolato rhodium complexes 779
DINUCLEATING LIGANDS
Reactivity of diiron(II) complexes with molecular oxygen 955
DIOXINS
Environmental endocrine disruptors 2319
DIOXYGENE REDUCTION
Time-resolved resonance Raman study of dioxygen reduction by cytochrome c oxidase 881
DIPHENYLATED GLUCOSE
An approach to the synthesis of polysaccharide analogues 425
DIPHOSPHETES
Coordination compounds with 3-, 4-, and 6-membered heterocycles containing phosphorus 819
DIPHTHERIA TOXOIDS
New concepts in controlled drug delivery 1283
DIRRION-DIOXYGEN COMPLEXES
Reactivity of diiron(II) complexes with molecular oxygen 955
DISCONNECTIBLE WORKBENCHES
About the use of molecular workbenches and platforms in organic synthesis 1487
DISPERSION POLYMERIZATION
Synthesis and characterization of polyurethane microspheres 1295
DISSOCIATION TECHNIQUES AND THERMOCHEMISTRY OF IONS
Recent advances in the energetics and mechanisms of gas-phase ionic reactions 1969
DISSOLUTION AND GROWTH OF SOLUBLE INORGANIC SALTS
The dissolution and growth of sparingly soluble inorganic salts: A kinetics and surface energy approach 1867
DISSOLUTION AND PRECIPITATION REACTIONS
Solubilities of metal carbonates 1913

DISULFITE REDUCTASE
Novel roles for Fe-S clusters in stabilizing or generating radical intermediates 939
DITERPENOIDS
Studies on the chemistry of Taxol® 331
DNA
Protein splicing: a novel form of gene expression and paradigm for self-catalyzed protein rearrangements 1
Plants as a factory to produce molecules 61
Improved gene delivery formulations and expression systems for enhanced transaction efficiency 83
Structural and biological properties of peptide nucleic acid (PNA) 105
Redesigning nucleic acids 263
Studies in biomimetic chemistry 267
Oxidative DNA damage mediated by metal–peptide complexes 275
Interaction of bleomycin with DNA 307
The impact of genomics on medicinal chemistry 359
Creating regular arrangements of nucleobases through metal ion coordination and H bond formation 977
Biodiversity and intraspecific genetic variation 2079
DNA AND RNA STRUCTURES
The effects of N7-coordinated cis-diammine-platinum(II) on the acid-base properties of guanine derivatives 845
DNA BASE RECOGNITION
Metal complexes in medicine: Design and mechanism of action 863
DNA BRIDGE
DNA-mediated electron transfer: Chemistry at a distance 873
DNA DUPLEXES
Ionic solutions and their pivotal roles in organic and biological systems 615
DNA TRIPLEX STABILITY
Enhancing DNA triplex stability via nucleobase modification 289
DNA-BINDING DOMAIN OF C-MYB ONCOPROTEIN
Multi-state thermal transitions of proteins—DNA-binding domain of the c-Myb oncoprotein 671
DNA-MEDIATED ELECTRON TRANSFER
DNA-mediated electron transfer: Chemistry at a distance 873
DONOR-ACCEPTOR COMPLEXES
Concept transfer from the life sciences into materials science 419
Dynamic effects in long-distance biological electron transfer reactions 2201
DOSE LEVEL SELECTION
Issues associated with the validation of *in vitro* and *in vivo* methods for assessing endocrine disrupting chemicals 1735
DROPLET IMPACT
Modeling droplet impact in plasma spray processes 1209
DRUG DELIVERY SYSTEMS
Liposomes: from membrane models to gene therapy 89
DUSTED PLASMA JETS
Eulerian and Lagrangian modelling of dust-laden plasma jets 1217
E. COLI
Novel roles for Fe-S clusters in stabilizing or generating radical intermediates 939
EARLY TRANSITION METALS
Main group elements in unusual coordination environments 765
ECOGEOGRAPHY
Natural products and evolutionary ecology 299
ECR ETCHING PLASMA
Plasma diagnosis by high-resolution spectroscopy of transient molecules 1145
EDC SCREENING METHODS
Review of suggested testing methods for endocrine-disrupting chemicals 1805
EFFLUENT STREAMS
Advanced oxidation processes applied to effluent streams from an agrochemical industry 2271
ELECTRIC ARC
Water-stabilized plasma generators 1157
Fluid dynamic modelling of electric arcs for industrial applications 1163
ELECTROACTIVE POLYMERS
Anodic generation of new ionophoric conducting polymers 1253
ELECTROCHEMICAL APPROACH TO ION SOLVATION
Studies on the electrochemical approach to ion solvation 1873
ELECTROCHEMICAL ENERGY STORAGE
Insertion reactions in advanced electrochemical energy storage 603
ELECTROCHEMICAL LUMINESCENCE
Spectroelectrochemistry: A survey of *in situ* spectroscopic techniques 1395R
ELECTRODES
Analytical aspects of chemically modified electrodes: Classification, critical evaluation and recommendations 1301*
ELECTRON DRIFT WAVE
Phasespace modelling of a radiofrequency plasma interacting with surfaces 1187
ELECTRON PARAMAGNETIC RESONANCE
Structural bases for the catalytic mechanism of NiFe hydrogenase 25
Spectroelectrochemistry: A survey of *in situ* spectroscopic techniques 1395R
ELECTRON TRANSFER KINETICS
Stereo- and site selection by enantiomers in electron-transfer reactions involving native and recombinant metalloproteins 985
ELECTRONIC STRUCTURE OF POLYRADICALS
Studies of the electronic structure of polyradicals by means of their magnetic properties 1953
ELECTRO-OPTICAL MODULATOR (EOM)
Time, space and spectrally resolved photochemistry from ensembles to single molecules 2147
ELECTROPHILIC REACTIVITIES
Reactivities and selectivities of free and metal-coordinated carbocations 1993
ELECTROSTATIC INTERACTIONS BETWEEN SURFACTANT MOLECULES AND SOLID SURFACE
Thermodynamics of adsorption of surfactants at solid–liquid interface 621
ELLIPSOMETRY
Plasma–surface interactions in the processing of III–V semiconductor materials 1181
Spectroelectrochemistry: A survey of *in situ* spectroscopic techniques 1395R
Supramolecular chemistry at interfaces 1985
EMULSION POLYMERIZATION
Synthesis and characterization of polyurethane microspheres 1295
ENANTIOCONTROL
Enantio- and regiocontrol in palladium- and tungsten-catalyzed allylic substitutions 1035
From D-camphor to the taxanes. Highly concise rearrangement-based approaches to taxusin and taxol 1449
ENANTIODIVERGENCE
An asymmetric induction principle and biomimetics with photons via electron transfer 2167
ENANTIOMERS
Enantioselective total synthesis of (–)-α-kainic acid 259
ENANTIOPURE AMINOALCOHOLS
Homogeneous catalysis as a tool for organic synthesis 1041
ENANTIOSELECTIVE
Enantioselective total synthesis of (–)-α-kainic acid 259
Homogeneous catalysis as a tool for organic synthesis 1041
New catalysts and methods for highly enantioselective metal carbene reactions 1123
ENANTIOSELECTIVE RING OPENING
Heterobimetallic asymmetric catalysts. Developments and applications 1027
Metal catalyzed hydrometalations and their applications in synthesis 1059
ENANTIOSELECTIVITY
Asymmetric synthesis using palladium catalysts 411
Chiral tridentate ligands based on 3-substituted binapthols and derived complex hydrides of aluminium 415
Asymmetric catalysis with chiral Lewis bases 1469
Some aspects of asymmetric catalysis with chiral ferrocenyl ligands 1477
Designer Lewis acids for selective organic synthesis 1507
Reactivity and selectivity in aggregate systems 1961
ENDOCRINE DISRUPTERS
Natural and Anthropogenic Environmental Oestrogens—an issue of special reports 1617
ENDOHEDRAL METALLOFULLERENES
Fullerenes coordinated to transition metals: Synthetic and stereochemical study 789
ENDOMETRIAL CANCER
Dietary phyto-oestrogens and cancer 1777
ENDOMETRIOSIS
Environmental endocrine disruptors 2319
ENERGY EXCITATIONS
Low temperature thermal properties of amorphous materials 599
ENOLIZATION
Kinetics of proton transfer reactions involving carbon 2221

HYDROPHOBIC MISMATCH
Modulation of membrane structure and function by hydrophobic mismatch between proteins and lipids 75
HYDROXYPOLYENES
Metal-oxo induced syn-oxidative polycyclizations of hydroxypolyenes: Biomimetic synthesis of polycyclic ether natural products 355
HYDROZIRCONATION REACTIONS
Kinetic vs. thermodynamic control in hydrozirconation reactions 1077
HYPERBRANCHED AROMATIC POLYESTERS
Star shaped and hyperbranched aromatic polyesters 1235
HYPOSPADIAS
Environmental oestrogens and male infertility 1685
HYPOTHALAMUS AND PITUITARY GLAND ANATOMY
Comparative physiology of the reproductive endocrine system in laboratory rodents and humans 1633
Comparative reproductive physiology of non-mammalian species 1657
IMINE PROTOMER OF INDOLE (3*H*-INDOLE)
Kinetics of proton transfer reactions involving carbon 2221
IMMERSED PLASMA LANCE
Thermal plasma process development in Norway 1223
IMMUNE SYSTEM DAMAGES
Environmental endocrine disruptors 2319
IMMUNOSUPPRESIVE ACTIVITY TESTS
Recent results on structural chemistry of new natural products from Chinese herbal medicine 431
IMMUNOSUPPRESIVE AGENTS
Fermentation-derived compounds as a source of new products 335
IMPACTION SCAVENGING
Clouds and pollution 1345
IN SITU MONITORING
New challenges in environmental chemistry 2259
IN VITRO AND *IN VIVO* METHODS
Issues associated with the validation of *in vitro* and *in vivo* methods for assessing endocrine disrupting chemicals 1735
Review of suggested testing methods for endocrine-disrupting chemicals 1805
INCINERATION
High temperature chemical aspects of waste disposal and environmental clean-up 461
INCOHERENT INFRARED RADIATION
Recent advances in the energetics and mechanisms of gas-phase ionic reactions 1969
INDINAVIR
Recent developments in the chemotherapy of HIV infections 567
INDUCTION FURNACE
High temperature chemical aspects of waste disposal and environmental clean-up 461
INDUCTIVELY COUPLED PLASMA
Water-stabilized plasma generators 1157
Toxic trace metal speciation: importance and tools for environmental and biological analysis 2281
INDUSTRIAL ECOLOGY
New challenges in environmental chemistry 2259
INDUSTRIAL WASTEWATER
Health risk assessment due to wastewater use in agriculture 2295
INERT AGGREGATES
Reactivity and selectivity in aggregate systems 1961
INFANTILE AMAUROTIC IDIOCY
Ganglioside research: New trends and reflections 533
INFERTILITY SYNDROME IN SHEEP
Clover phyto-oestrogens in sheep in Western Australia 1855
INFRARED DIODE LASER SPECTROSCOPY
Plasma diagnosis by high-resolution spectroscopy of transient molecules 1145
INFRARED REFLECTANCE SPECTROSCOPY
Spectroelectrochemistry: A survey of *in situ* spectroscopic techniques 1395R
INFRARED SPECTROSCOPY
Structural bases for the catalytic mechanism of NiFe hydrogenase 25
Supramolecular chemistry at interfaces 1985
INHIBINS AND ACTIVINS
Comparative physiology of the reproductive endocrine system in laboratory rodents and humans 1633
INHIBITORS
Repartition of various soluble and insoluble species in supersaturated solutions 1921

© 1998 IUPAC

INSECTICIDES
Neurotransmitters and the control of hypophyseal gonadal functions: possible implications of endocrine disruptors 1647
INSERTION REACTIONS
Wide-temperature range observations on reactions of metal atoms and small radicals 469
Insertion reactions in advanced electrochemical energy storage 603
INSULIN
Synthesis of oligosaccharides of biological importance 293
INTERACTION ENERGY
Mechanism of hydration of urea and guanidium ion: A model study of denaturation of proteins 659
INTERFACIAL ADSORPTION AND COMPLEXATION
Interfacial adsorption and complexation in liquid–liquid extraction systems 1889
INTERFACIAL CHEMICAL REACTIONS
Reactively compatibilized polymer blends: Interfacial chemical reactions during melt-extrusion 1289
INTERFACIAL CHEMISTRY
Interfacial microchemistry: reactions in inorganic systems 501
INTERFACIAL ELECTRON TRANSFER PROPERTIES
Interfacial photochemistry: fundamental and applications 2177
INTERFACIAL FREE ENERGY
The dissolution and growth of sparingly soluble inorganic salts: A kinetics and surface energy approach 1867
INTERFACIAL PHENOMENA IN BIOCORROSION
Interfacial phenomena in biocorrosion 627
INTERFACIAL PHOTOCHEMISTRY
Interfacial photochemistry: fundamental and applications 2177
INTERFACIAL PROPERTIES OF METALLIC SURFACES COVERED WITH BIOFILMS
Interfacial phenomena in biocorrosion 627
INTERFACIAL REACTIVITY
Interfacial adsorption and complexation in liquid–liquid extraction systems 1889
INTRINSIC BARRIERS
Intrinsic barriers to the formation and reaction of carbocations 2007
IODINE SPECIATION
The determination of iodine species in environmental and biological samples 1567R
ION BEAM ENHANCED DEPOSITION
Synthesis of ceramic films on metallic substrates using magnetron-sputtering deposition synchro-enhanced by microwave ECR plasma source ion implantation under high vacuum conditions 1199
IONIC SOLUTIONS IN ORGANIC AND BIOLOGICAL SYSTEMS
Ionic solutions and their pivotal roles in organic and biological systems 615
IONIZED CLUSTER BEAM
High rate deposition of thick epitaxial films by thermal plasma flash evaporation 1193
IONOPHORIC CONDUCTING POLYMERS
Anodic generation of new ionophoric conducting polymers 1253
IONOTROPIC SIGNALING
Cell regulatory function of glycophingolipids: carbohydrate recognition and biosignaling 49
ION-PAIR EXTRACTION
Ion-pair extraction of metalloporphyrins into a mixture of acetonitrile with water 1925
ION-SELECTIVE ELECTRODES (ISES)
Studies on the electrochemical approach to ion solvation 1873
ION–SOLVENT (I-S) INTERACTIONS
Ionic solutions and their pivotal roles in organic and biological systems 615
IRON BLEOMYCIN
Complexes of lopsided N-donor heterocyclic bioligands: Has the electrostatic effect of the N_2CH proton been overlooked in metallobiochemistry? 961
IRON PORPHYRINS
Iron porphyrins reinvistigated by new method: Mössbauer spectroscopy using synchrotron radiation 917
IRON-COPPER DINUCLEAR SITE IN CYTOCHROME C OXIDASE
Copper–dioxygen complexes: Functional models for proteins 855
IRON-SULFUR CLUSTER
Novel roles for Fe-S clusters in stabilizing or generating radical intermediates 939
IRRIGATION WATER
Health risk assessment due to wastewater use in agriculture 2295
I-S INTERACTIONS
Ionic solutions and their pivotal roles in organic and biological systems 615
ISOCITRATE DEHYDROGENASE
Visualising enzyme and ribozyme intermediates using fast diffraction and reaction trapping methods 17
ISOFLAVONE PHYTO-OESTROGENS
Clover phyto-oestrogens in sheep in Western Australia 1855
ISOFLAVONOIDS AND LIGNANS
Naturally occurring oestrogens in food Naturally occurring oestrogens in food 1759
ISONUCLEOSIDE SYNTHESIS
Studies on the syntheses and biological activities of isonucleosides 435
ISOPENTENYLADENINE
Structure-based inhibitor design for CDK2, a cell cycle controlling protein kinase 555
ISOTHERMAL HEAT CONDUCTION MICROCALORIMETRY
Thermodynamic and kinetic parameters from isothermal heat conduction microcalorimetry 633
ISOTOPIC COMPOSITIONS
Isotopic compositions of the elements 217R
JAHN-TELLER FORCE
Electronic structure contributions to function in bioorganic chemistry: The blue copper active site 799
JOSAMYCIN
Fermentation-derived compounds as a source of new products 335
KETO-ENOL EQUILIBRIA
Kinetics of proton transfer reactions involving carbon 2221
KINETIC ELLIPSOMETRY
Plasma–surface interactions in the processing of III–V semiconductor materials 1181
KINETIC MEASUREMENTS
Wide-temperature range observations on reactions of metal atoms and small radicals 469
KINETIC MODELING
High temperature chemical aspects of waste disposal and environmental clean-up 461
Simulation of surface reactions 477
KINETIC PHASE TRANSFORMATION
The dissolution and growth of sparingly soluble inorganic salts: A kinetics and surface energy approach 1867
KINETIC SPECTROSCOPY
Plasma diagnosis by high-resolution spectroscopy of transient molecules 1145
KINETIC STUDIES OF GALACTOSE OXIDASE
Mechanistic studies on the single copper tyrosyl-radical containing enzyme galactose oxidase 897
KINETIC VS. THERMODYNAMIC CONTROL
Copper–dioxygen complexes: Functional models for proteins 855
Kinetic vs. thermodynamic control in hydrozirconation reactions 1077
KINETICS AND SURFACE ENERGY
The dissolution and growth of sparingly soluble inorganic salts: A kinetics and surface energy approach 1867
KINETICS OF CRYSTALLIZATION
The dissolution and growth of sparingly soluble inorganic salts: A kinetics and surface energy approach 1867
KINETICS OF PHASE SEPARATION
Rheological and mechanical properties of poly(α-methylstyrene-co-acrylonitrile)/poly(methyl methacrylate) blends in miscible and phase separated regimes of various morphologies 1547R
KINETICS OF PROTON TRANSFER REACTIONS INVOLVING CARBON
Kinetics of proton transfer reactions involving carbon 2221
KINETICS OF SOLID-STATE REACTIONS
Thermodynamic and kinetic parameters from isothermal heat conduction microcalorimetry 633
KIRKENDALL EFFECT
Interfacial microchemistry: reactions in inorganic systems 501
LABORATORY CALIBRATION PROGRAMS
New challenges in environmental chemistry 2259
LABORATORY PERFORMANCE
Laboratory proficiency testing programmes 2309
Capability of the laboratories of universities to develop environmental studies 2333
LACTATE DEHYDROGENASE
Yeast chorismate and other allosteric enzymes 527
LADLE HEATING
Fluid dynamic modelling of electric arcs for industrial applications 1163
LAGRANGIAN MODELLING
Eulerian and Lagrangian modelling of dust-laden plasma jets 1217

© 1998 IUPAC

LAMIVUDINE
Recent developments in the chemotherapy of HIV infections 567
LANDAU-GINSBURG-WILSON MODEL
Critical phenomena of chain-molecule solutions 609
LANTIBIOTICS
Lantibiotics and microcins: novel posttranslational modifications of polypeptides 97
LASER TRAPPING
Time, space and spectrally resolved photochemistry from ensembles to single molecules 2147
LASER-BASED ATOMIC SPECTROSCOPY
Laser-based atomic spectroscopy: a new notation for spectrochemical processes 517*
LATERAL CHAIN-CHAIN INTERACTIONS
Thermodynamics of adsorption of surfactants at solid–liquid interface 621
LATTICE BUILDING
Simulation of surface reactions 477
LEISHMANIA
Synthesis of oligosaccharides of biological importance 293
LEUKOCYTE ACTIVATION
Design of inhibitors of leukotriene biosynthesis and their therapeutic potential 271
LEWIS ACID
Heterobimetallic asymmetric catalysts. Developments and applications 1027
Designer Lewis acids for selective organic synthesis 1507
LEWIS ACID-CATALYZED ENANTIOSELECTIVE REACTIONS
New types of Lewis acids used in organic synthesis 1019
LEWIS BASE COORDINATION
Main group elements in unusual coordination environments 765
LEYDIG CELL FUNCTION
Environmental oestrogens and male infertility 1685
LICHENS
Cultural heritage and the environment 2327
LICOISOFLAVONE
A search for novel chemotherapy against tuberculosis amongst natural products 365
LIFE CYCLE TESTS
Review of suggested testing methods for endocrine-disrupting chemicals 1805
LIGAND "PACKAGES"
Tailoring molecular assemblies for metal ion bending 2345
LIGAND/RECEPTOR ADDUCTS
Solving challenging bioorganic problems by exciton coupled CD 377
LIGATING MOEITIES
Suprasupermolecular chemistry: the chemistry within the dendrimer 2337
LIGHT EMISSION METHODS
Spectroelectrochemistry: A survey of *in situ* spectroscopic techniques 1395R
LIGHT METALS AS NEGATIVE BATTERY ELECTRODE MATERIALS
Insertion reactions in advanced electrochemical energy storage 603
LIGHT SCATTERING FROM NONFLAT SURFACES
Spectroelectrochemistry: A survey of *in situ* spectroscopic techniques 1395R
LIGHT SCATTERING MEASUREMENTS
Phase transitions in multicomponent liquid systems: The key role of electrolytes 591
LIGHT-ABSORBING MOLECULES
A photoresponsive molecular switch. Reaction of CO_2 and epoxide regulated by an aluminum porphyrin–stilbazole system 2365
LIGHT-ACTIVATED SEMICONDUCTORS
Interfacial photochemistry: fundamental and applications 2177
LIGHT-DRIVEN SWITCHING-SYSTEM
A photoresponsive molecular switch. Reaction of CO_2 and epoxide regulated by an aluminum porphyrin–stilbazole system 2365
LINEAR DICHROISM
Spectroelectrochemistry: A survey of *in situ* spectroscopic techniques 1395R
LINEAR OXIDATION KINETICS
Nonlinear dynamics in closed biological and chemical systems 645
LINEAR VISCOELASTICITY OF MELT
Rheological and mechanical properties of poly(α-methylstyrene-co-acrylonitrile)/poly(methyl methacrylate) blends in miscible and phase separated regimes of various morphologies 1547R
LIPOCHITOOLIGOMERS
Acylated chitooligomers are molecular signals that mediate the symbiotic interactions between nitrogen-fixing bacteria and their host plants 55
LIPOSOMES
Liposomes: from membrane models to gene therapy 89
LIQUID CRYSTALLINE POLYMERS
Liquid crystalline polymers: The effects of chain disruptors 1249
LIQUID INJECTION
High temperature chemical aspects of waste disposal and environmental clean-up 461
LIQUID JUNCTION POTENTIAL (LJP) BETWEEN DIFFERENT SOLVENTS
Studies on the electrochemical approach to ion solvation 1873
LIQUID PHASE EPITAXY
High rate deposition of thick epitaxial films by thermal plasma flash evaporation 1193
LIQUID-LIQUID EQUILIBRIA
Nomenclature for phase diagrams with particular reference to vapour–liquid and liquid–liquid equilibria 2233R
LIQUID-LIQUID EXTRACTION SYSTEMS
Interfacial adsorption and complexation in liquid–liquid extraction systems 1889
LITHIUM BATTERY ELECTROLYTES
Solubility problems relating to lithium battery electrolytes 1905
LONG OPTICAL PATH THIN LAYER CELLS (LOPTLC)
Spectroelectrochemistry: A survey of *in situ* spectroscopic techniques 1395R
LONG-LIVED CARBODICATIONS
Investigations on intriguing long lived carbocations 2001
LONG-RANGE ELECTRON TRANSFER
Dynamic effects in long-distance biological electron transfer reactions 2201
LONG-TERM STABILITY OF PHARMACEUTICAL COMPOUNDS
Thermodynamic and kinetic parameters from isothermal heat conduction microcalorimetry 633
LOOPY MOLECULES
Nanogels and microgels: The new polymeric materials playground 1271
LOW PRESSURE PLASMAS
Plasma–surface interactions in the processing of III–V semiconductor materials 1181
LOW TEMPERATURE THERMAL PROPERTIES OF AMORPHOUS MATERIALS
Low temperature thermal properties of amorphous materials 599
LOW-ENERGY EXCITATIONS
Low temperature thermal properties of amorphous materials 599
L-RHAMNOSE MIMICS
Sugar mimics from sugar lactones 279
LUTEINIZING HORMONE RELEASING HORMONE (LHRH)
Neurotransmitters and the control of hypophyseal gonadal functions: possible implications of endocrine disruptors 1647
MACROCYCLIC SUGAR CLUSTERS
Molecular delivery systems using macrocyclic sugar clusters 2379
MACROLACTONES
Structure/activity relationships 1725
MACROLIDE ANTIBIOTICS
Fermentation-derived compounds as a source of new products 335
MACROPHYTES AS MONITORS OF METAL POLLUTION
Monitoring eutrophication and pollution in estuarine environments—focusing on the use of benthic communities 2313
MACRORADICAL GENERATION
Poly(ethylene glycol) block copolymers by redox process: Kinetics, synthesis and characterization 1245
MAGNETIC SUSCEPTIBILITY
Studies of the electronic structure of polyradicals by means of their magnetic properties 1953
MAGNETOCHEMICAL EFFECTS
Probing photochemical reactions with assistance of magnetic fields 827
MAGNETRON-SPUTTERING DEPOSITION
Synthesis of ceramic films on metallic substrates using magnetron-sputtering deposition synchro-enhanced by microwave ECR plasma source ion implantation under high vacuum conditions 1199
MAIN GROUP CHEMISTRY
Main group elements in unusual coordination environments 765
MAITOTOXIN
Complete structure of maitotoxin 339
MALDI
Non-covalent synthesis of organic nanostructures 1459
Chemistry of photoproteins as interface between bioactive molecules and protein function 2085
MALE FERTILITY
Environmental endocrine disruptors 2319

© 1998 IUPAC

MALE INFERTILITY
Environmental oestrogens and male infertility 1685
MARCUS EQUATION
Intrinsic barriers to the formation and reaction of carbocations 2007
Kinetics of proton transfer reactions involving carbon 2221
MASS TRANSFER
Clouds and pollution 1345
MATERIALS SCIENCE
Concept transfer from the life sciences into materials science 419
MATHEMATICAL MODELLING OF THERMAL PLASMAS
Thermal plasma process development in Norway 1223
MATRIX-ISOLATION INFRARED SPECTROSCOPY
High temperature chemical aspects of waste disposal and environmental clean-up 461
MECHANICAL PROPERTIES OF POLYMERS
Definition of terms relating to the non-ultimate mechanical properties of polymers 701*
MECHANISM OF HYDRATION OF UREA AND GUANIDIUM ION
Mechanism of hydration of urea and guanidium ion: A model study of denaturation of proteins 659
MECHANISMS OF ENDOCRINE DISRUPTION
Issues associated with the validation of *in vitro* and *in vivo* methods for assessing endocrine disrupting chemicals 1735
MEDICINAL CHEMISTRY
The impact of genomics on medicinal chemistry 359
Glossary of terms used in medicinal chemistry 1129*
MEDICINAL PLANTS
New natural products from medicinal plants of Pakistan 385
Biological activities of some Turkish medicinal plants 403
MELT RHEOLOGY
Rheological and mechanical properties of poly(α-methylstyrene-co-acrylonitrile)/poly(methyl methacrylate) blends in miscible and phase separated regimes of various morphologies 1547R
MELT-EXTRUSION
Reactively compatibilized polymer blends: Interfacial chemical reactions during melt-extrusion 1289
MELTING TEMPERATURE (TM)
Ionic solutions and their pivotal roles in organic and biological systems 615
MERCURY DETERMINATION METHODS
The determination of mercury species in environmental and biological samples 1585R
METABOLIC ACTIVITIES OF SMALL ANIMALS
Monitoring metabolic activities of small animals by means of microcalorimetry 635
METABOLISM AND FATE OF XENO-OESTROGENS IN MAN
Metabolism and fate of xenoestrogens in man 1747
METABOTROPIC SIGNALING
Cell regulatory function of glycophingolipids: carbohydrate recognition and biosignaling 49
METAL BASICITY
Metal basicity and cooperative effects in the reactions of dinuclear pyrazolato rhodium complexes 779
METAL CARBONYLS
Tungsten-alkynyl and -propargyl compounds for organic syntheses 1111
METAL CATALYZED HYDROMETALATIONS
Metal catalyzed hydrometalations and their applications in synthesis 1059
METAL CHALCOGENIDE CLUSTER CHEMISTRY
Tetrahedral, oxtahedral, cubal and centered cubal dithiolate clusters and cages of Cu(I) and Ag(I) 839
METAL COMPLEXATION
Tailoring molecular assemblies for metal ion bending 2345
METAL COMPLEXES IN MEDICINE
Metal complexes in medicine: Design and mechanism of action 863
METAL COORDINATION CHEMISTRY
The effects of N7-coordinated cis-diammine-platinum(II) on the acid-base properties of guanine derivatives 845
Tailoring molecular assemblies for metal ion bending 2345
METAL DIHYDRIDE COMPLEXES
Metal dihydride complexes: Photochemical mechanisms for reductive elimination 2211
METAL FULLERENE COMPLEXES
Fullerenes coordinated to transition metals: Synthetic and stereochemical study 789
METAL ION BINDING
Tailoring molecular assemblies for metal ion bending 2345
METAL ION COORDINATION
Creating regular arrangements of nucleobases through metal ion coordination and H bond formation 977
METAL ION SEPARATIONS
Metal ion extraction by lariat ethers with 'tunable' proton-ionizable groups 2393
METAL ION/METAL AMALGAM ELECTRODES
Studies on the electrochemical approach to ion solvation 1873
METAL ION-ASSISTED STAKING INTERACTIONS
Metal ion-assisted stacking interactions and the facilitated hydrolysis of nucleoside 5'-triphosphates 969
METAL TOXICITY
Complexes of lopsided N-donor heterocyclic bioligands: Has the electrostatic effect of the N_2CH proton been overlooked in metallobiochemistry? 961
Monitoring eutrophication and pollution in estuarine environments—focusing on the use of benthic communities 2313
METAL-BIOFILM SYSTEMS
Interfacial phenomena in biocorrosion 627
METAL-CATALYZED ASYMMETRIC HETERO-ENE REACTIONS
Metal-catalyzed asymmetric hetero-Diels–Alder reactions of unactivated dienes with glyoxylates 1117
METAL-COORDINATED CARBOCATIONS
Reactivities and selectivities of free and metal-coordinated carbocations 1993
METAL-IMIDAZOLE INTERACTIONS
Complexes of lopsided N-donor heterocyclic bioligands: Has the electrostatic effect of the N_2CH proton been overlooked in metallobiochemistry? 961
METAL-ION COMPLEXES
An overview on the solution thermodynamics of lower rim functionalised calixarene derivatives and metal cations. New derivatives containing amino and thioalkyl functional groups 769
METAL-ION SOLVENT EXTRACTION
Tailoring molecular assemblies for metal ion bending 2345
METALLIC AND NONMETALLIC ELECTROPHILES
Coordination compounds with 3-, 4-, and 6-membered heterocycles containing phosphorus 819
METAL-LIGATING ATOMS
Binding biomolecules with designed, hydrogen-bonding receptors 2371
METALLOAGGREGATES
Reactivity and selectivity in aggregate systems 1961
METALLOBIOCHEMISTRY
Complexes of lopsided N-donor heterocyclic bioligands: Has the electrostatic effect of the N_2CH proton been overlooked in metallobiochemistry? 961
METALLOCENE CATALYSTS
New polyolefins by metallocene catalysts 1229
METALLOENZYMES
Radical copper oxidases, one electron at a time 903
Complexes of lopsided N-donor heterocyclic bioligands: Has the electrostatic effect of the N_2CH proton been overlooked in metallobiochemistry? 961
METALLOPORPHYRINS
Ion-pair extraction of metalloporphyrins into a mixture of acetonitrile with water 1925
METALLOPROTEINS
Complexes of lopsided N-donor heterocyclic bioligands: Has the electrostatic effect of the N_2CH proton been overlooked in metallobiochemistry? 961
Stereo- and site selection by enantiomers in electron-transfer reactions involving native and recombinant metalloproteins 985
METAL-METAL BONDED COMPLEXES
Metal basicity and cooperative effects in the reactions of dinuclear pyrazolato rhodium complexes 779
METAL-NUCLEIC ACID INTERACTIONS
Creating regular arrangements of nucleobases through metal ion coordination and H bond formation 977
METAL-NUCLEOBASE COMPLEXES
Creating regular arrangements of nucleobases through metal ion coordination and H bond formation 977
METAL-PEPTIDE COMPLEXES
Oxidative DNA damage mediated by metal–peptide complexes 275
METALS HIGH-TEMPERATURE PHOTOCHEMISTRY
Wide-temperature range observations on reactions of metal atoms and small radicals 469
METHANE MONOOXYGENASE
The high valent nonheme Fe_2O_2 diamond core: Comparisons with the heme ferryl 947
Reactivity of diiron(II) complexes with molecular oxygen 955
METHANE RF AND METHANOL ECR PLASMAS
Plasma diagnosis by high-resolution spectroscopy of transient molecules 1145

© 1998 IUPAC

METHOTREXATE
New concepts in controlled drug delivery 1283
METHOXYCHLOR
Metabolism and fate of xenoestrogens in man 1747
MICELLES
Reactivity and selectivity in aggregate systems 1961
MICROBIAL DEGRADATION
Interfacial phenomena in biocorrosion 627
Computer modelling of microbial hydrolytic dehalogenation 1375
MICROCALORIMETRY
Thermodynamic and kinetic parameters from isothermal heat conduction microcalorimetry 633
Monitoring metabolic activities of small animals by means of microcalorimetry 695
MICROCINS
Lantibiotics and microcins: novel posttranslational modifications of polypeptides 97
MICROGELS
Nanogels and microgels: The new polymeric materials playground 1271
MICROPHYSICAL PROCESSES
Clouds and pollution 1345
MICROSTRUCTURE DEVELOPMENT
Precursor-derived Si-B-C-N ceramics 439
MICROWAVE ABSORPTION
Spectroelectrochemistry: A survey of *in situ* spectroscopic techniques 1395R
MICROWAVE PLASMA
High rate deposition of thick epitaxial films by thermal plasma flash evaporation 1193
Synthesis of ceramic films on metallic substrates using magnetron-sputtering deposition synchro-enhanced by microwave ECR plasma source ion implantation under high vacuum conditions 1199
MIES SCATTERING ELLIPSOMETRY
Treatment of dust particles in an RF plasma monitored by Mie scattering rotating compensator ellipsometry 1151
MILBEMYCIN
Fermentation-derived compounds as a source of new products 335
MIMICKING BACTERIAL PHOTOSYNTHESIS
Mimicking bacterial photosynthesis 2189
MINIATURIZATION OF FIELD INSTRUMENTATION
New challenges in environmental chemistry 2259
MITOMYCIN
New concepts in controlled drug delivery 1283
MIXED CONDENSATIONS
Functionalized calix[4]pyrroles 2401
MOLECULAR CHIRALITY
Solving challenging bioorganic problems by exciton coupled CD 377
MOLECULAR DELIVERY SYSTEMS
Molecular delivery systems using macrocyclic sugar clusters 2379
MOLECULAR DYNAMICS SIMULATION
Simulation of surface reactions 477
Interfacial adsorption and complexation in liquid–liquid extraction systems 1889
MOLECULAR STATE OF C_{60} AND C_{70} IN SOLVENTS AND SOLVENT MIXTURES
Solubility and molecular state of C_{60} and C_{70} in solvents and solvent mixtures 1881
MOLECULAR WORKBENCHES AND PLATFORMS
About the use of molecular workbenches and platforms in organic synthesis 1487
MOLTEN METAL ENVIRONMENT
High temperature chemical aspects of waste disposal and environmental clean-up 461
MOLTEN SALT
High temperature chemical aspects of waste disposal and environmental clean-up 461
MOLYBDENUM ENZYMES
Transition metal sulfur chemistry and its relevance to molybdenum and tungsten enzymes 889
MONENSIN
Metal-oxo induced syn-oxidative polycyclizations of hydroxypolyenes: Biomimetic synthesis of polycyclic ether natural products 355
MONITORING ENVIRONMENTAL CHANGES
Monitoring eutrophication and pollution in estuarine environments—focusing on the use of benthic communities 2313
MONOLAYER PROPERTIES
Supramolecular chemistry at interfaces 1985
MONOOXYGENASE MODEL SYSTEM
Copper–dioxygen complexes: Functional models for proteins 855
MOSSBAUER SPECTROSCOPY
Iron porphyrins reinvistigated by new method: Mössbauer spectroscopy using synchrotron radiation 917
Spectroelectrochemistry: A survey of *in situ* spectroscopic techniques 1395R
MULTICOMPONENT CARBONATE SYSTEMS
Solubilities of metal carbonates 1913
MULTICOMPONENT LIQUID SYSTEMS
Phase transitions in multicomponent liquid systems: The key role of electrolytes 591
MULTICOMPONENT PHASE RELATIONSHIPS
Enhancing materials design capability through understanding multicomponent phase relationships 509
MULTIDRUG RESISTANT TB (MDR-TB)
A search for novel chemotherapy against tuberculosis amongst natural products 365
MULTIPHASE EQUILIBRIA
Thermodynamic modelling of solution and ordered phases 449
MULTIPHASE INORGANIC SYSTEMS
Interfacial microchemistry: reactions in inorganic systems 501
MULTIPLE DISSOCIATION OF IONS
Recent advances in the energetics and mechanisms of gas-phase ionic reactions 1969
MULTIPLE HEARTH
High temperature chemical aspects of waste disposal and environmental clean-up 461
MULTIPLE-EQUILIBRIUM SYSTEMS
Response reactions: An interpretative concept in chemical thermodynamics 583
MULTI-STATE THERMAL TRANSITIONS OF PROTEINS
Multi-state thermal transitions of proteins—DNA-binding domain of the c-Myb oncoprotein 671
MUTAGENESIS
Visualising enzyme and ribozyme intermediates using fast diffraction and reaction trapping methods 17
Oxidative DNA damage mediated by metal–peptide complexes 275
MUTANT PLASTOCYANINES
Stereo- and site selection by enantiomers in electron-transfer reactions involving native and recombinant metalloproteins 985
MUTATIONS AT HEME DISTAL AND PROXIMAL SITES
Structure–activity relation of horseradish peroxidases as studied with mutations at heme distal and proximal sites 911
MYO-INOSITOL
Synthesis of oligosaccharides of biological importance 293
N7-COORDINATED CISPLATIN
The effects of N7-coordinated cis-diammine-platinum(II) on the acid-base properties of guanine derivatives 845
NANOARCHITECTURE: SURFACE BOUND FERRO(I)CYANIDE ION
Surface electrochemistry of inorganic complexes 755
NANOCELES
Nanogels and microgels: The new polymeric materials playground 1271
NANO-CRYSTALLINE FILMS
High rate deposition of thick epitaxial films by thermal plasma flash evaporation 1193
NATURAL AND SYNTHETIC CHEMICALS
Principles of risk assessment 1671
NATURAL HORMONES
Environmental exposure, species differences and risk assessment 1829
NATURAL POLYMERS
New concepts in controlled drug delivery 1283
NATURAL PRODUCT DRUG DISCOVERY
Biodiversity and natural product drug discovery
N-DONOR HETEROCYCLIC BIOLIGANDS
Complexes of lopsided N-donor heterocyclic bioligands: Has the electrostatic effect of the N_2CH proton been overlooked in metallobiochemistry? 961
NEGATIVE ENTROPY
Thermodynamics and biology 579
NELFINAVIR
Recent developments in the chemotherapy of HIV infections 567
NEMATOCIDES
Environmental endocrine disruptors 2319
NEUROACTIVE SIALYLCHOLESTEROL
Ganglioside research: New trends and reflections 533
NEUROENDOCRINE SYSTEM
Neurotransmitters and the control of hypophyseal gonadal functions: possible implications of endocrine disruptors 1647

Biodiversity and natural product drug discovery 2065
NMR TITRATION STUDIES
Tailoring molecular assemblies for metal ion bending 2345
NODULATION GENES
Acylated chitooligomers are molecular signals that mediate the symbiotic interactions between nitrogen-fixing bacteria and their host plants 55
NOMENCLATURE FOR SPECIAL STATES OF FLUID MIXTURES
Nomenclature for phase diagrams with particular reference to vapour–liquid and liquid–liquid equilibria 2233R
NONAROMATIC OESTROGENS
Structure/activity relationships 1725
NONCONAVALENT SYNTHESIS
Non-covalent synthesis of organic nanostructures 1459
NONDISCONNECTIBLE WORKBENCHES
About the use of molecular workbenches and platforms in organic synthesis 1487
NONEQUILIBRIUM THERMODYNAMIC MODEL OF ATP SYNTHESIS
A thermodynamic principle for the coupled bioenergetic processes of ATP synthesis 639
NONHEME DIIRON ENZYMES
The high valent nonheme Fe_2O_2 diamond core: Comparisons with the heme ferryl 947
NONLINEAR DYNAMICS IN CLOSED BIOLOGICAL AND CHEMICAL SYSTEMS
Nonlinear dynamics in closed biological and chemical systems 645
NONLINEAR OPTICAL (NLO) PROPERTIES
Photoinduced manipulations of photochromes in polymers: Anisotropy, modulation of the NLO properties and creation of surface gratings 2157
NONLINEAR OPTICAL TECHNIQUES
Spectroelectrochemistry: A survey of *in situ* spectroscopic techniques 1395R
NONLINEAR OXIDATION KINETICS
Nonlinear dynamics in closed biological and chemical systems 645
NONLINEAR PROTEIN LEAK
A thermodynamic principle for the coupled bioenergetic processes of ATP synthesis 639
NONMAMMALIAN SPECIES
Comparative reproductive physiology of non-mammalian species 1657
NONMETHANE ORGANIC COMPOUNDS (NMOCS)
Gas-phase degradation of organic compounds in the troposphere 1327
NONOCCUPATIONAL EXPOSURE ASSESSMENT
Oestrogenic potency of nonylphenol *in vivo*—a case study to evaluate the relevance of human non-occupational exposure 1847
NON-REFRACTORY (COLD) CATHODES
Cold cathode arc attachment: The importance of the high local pressure 1175
NON-STOICHIOMETRIC COMPOUNDS
Thermodynamic modelling of solution and ordered phases 449
NONYLPHENOL (NP)
Oestrogenic potency of nonylphenol *in vivo*—a case study to evaluate the relevance of human non-occupational exposure 1847
NORBORNENE
New polyolefins by metallocene catalysts 1229
NOVEL BUILDING BLOCKS
Suprasupermolecular chemistry: the chemistry within the dendrimer 2337
NOZAKI-HIYAMA-KISHI REACTIONS
Low-valent transition metal induced C–C-bond formations: Stoichiometric reactions evolving into catalytic processes 1071
NUCLEAR DYNAMICS
Dynamic effects in long-distance biological electron transfer reactions 2201
NUCLEAR HORMONE RECEPTOR MIMICS
Review of suggested testing methods for endocrine-disrupting chemicals 1805
NUCLEAR INELASTIC SCATTERING
Iron porphyrins reinvistigated by new method: Mössbauer spectroscopy using synchrotron radiation 917
NUCLEAR MAGNETIC RESONANCE
Structural and biological properties of peptide nucleic acid (PNA) 105
Recommendations for the presentation of NMR structures of proteins and nucleic acids 117*
Spectroelectrochemistry: A survey of *in situ* spectroscopic techniques 1395R
NUCLEAR RECEPTORS
A structural view of ligand binding to the retinoid receptors 41
NUCLEATION OF DROPS
Clouds and pollution 1345
NUCLEIC ACIDS
Structural and biological properties of peptide nucleic acid (PNA) 105
Recommendations for the presentation of NMR structures of proteins and nucleic acids 117*
Redesigning nucleic acids 263
Complexes of lopsided N-donor heterocyclic bioligands: Has the electrostatic effect of the N_2CH proton been overlooked in metallobiochemistry? 961
NUCLEOBASE
Structural and biological properties of peptide nucleic acid (PNA) 105
Redesigning nucleic acids 263
Enhancing DNA triplex stability via nucleobase modification 289
Studies on the syntheses and biological activities of isonucleosides 435
Creating regular arrangements of nucleobases through metal ion coordination and H bond formation 977
NUCLEOPHILIC ADDITON TO CARBOCATIONS
Intrinsic barriers to the formation and reaction of carbocations 2007
NUCLEOPHILIC AROMATIC DISPLACEMENT REACTIONS
A search for novel chemotherapy against tuberculosis amongst natural products 365
NUCLEOPHILIC ATTACK OF PALLADIUM (0) COMPLEX
New transformations of unsaturated hydrocarbon ligands coordinated with mono- and dinuclear palladium units 1105
NUCLEOPHILIC CATALYSIS
Asymmetric catalysis with chiral Lewis bases 1469

© 1998 IUPAC

NUCLEOPHILIC REACTIONS AT CARBON, SILICON, AND GERMANIUM CENTERS
Recent advances in the energetics and mechanisms of gas-phase ionic reactions 1969
NUCLEOSIDES
New approaches to glycoconjugate synthesis 397
NUCLEOTIDES
Practical syntheses of antiviral nucleosides 313
The impact of genomics on medicinal chemistry 359
Binding biomolecules with designed, hydrogen-bonding receptors 2371
NUCLEOTIDES IN CELL METABOLISM
Metal ion-assisted stacking interactions and the facilitated hydrolysis of nucleoside 5′-triphosphates 969
OESTROGENS
Natural and Anthropogenic Environmental Oestrogens—an issue of special reports 1617
OLIGODEOXYNUCLEOTIDES
Studies on the syntheses and biological activities of isonucleosides 435
OLIGONUCLEOTIDE-BASED DRUGS
Enhancing DNA triplex stability via nucleobase modification 289
OLIGONUCLEOTIDES
Development of artificial ribonucleases 111
Redesigning nucleic acids 263
Studies on the syntheses and biological activities of isonucleosides 435
OLIGORIBONUCLEOTIDES
Development of artificial ribonucleases 111
OLIGOSACCHARIDE SYNTHESIS
Synthesis of oligosaccharides of biological importance 293
New approaches to glycoconjugate synthesis 397
Chemical synthesis of oligosaccharide mimetics 407
OLOMOUCINE
Structure-based inhibitor design for CDK2, a cell cycle controlling protein kinase 555
OPEN-CHAIN COMPOUNDS
Structural modification and solvent interactions in solvolytic reactions of open-chain compounds 2025
OPHTHALMIC DELIVERY
New concepts in controlled drug delivery 1283
OPTICAL CHEMOSENSORS FOR CREATININE
Binding biomolecules with designed, hydrogen-bonding receptors 2371
OPTICALLY TRANSPARENT ELECTRODES (OTE)
Spectroelectrochemistry: A survey of *in situ* spectroscopic techniques 1395R
ORAL DELIVERY OF INSULIN AND VACCINES
New concepts in controlled drug delivery 1283
ORDER-DISORDER TRANSFORMATIONS
Thermodynamic modelling of solution and ordered phases 449
ORDERED PHASES
Thermodynamic modelling of solution and ordered phases 449
ORGANIC IODINE COMPOUNDS
The determination of iodine species in environmental and biological samples 1567R
ORGANIC NANOSTRUCTURES
Non-covalent synthesis of organic nanostructures 1459
ORGANOCHLORINE PESTICIDE ANALYSIS
Laboratory proficiency testing programmes 2309
ORGANOMETALLIC CHEMISTRY OF FULLERENES
Fullerenes coordinated to transition metals: Synthetic and stereochemical study 789
ORGANOMETALLIC REACTION MECHANISMS
The role of complexes in defining organometallic reaction mechanisms 1939
ORGANOSILICON PLASMAS
Process control of organosilicon plasmas for barrier film preparations 1203
ORTHOGONAL PROTECTION OF DIALKYNES
An approach to the synthesis of polysaccharide analogues 425
OSCILLATORY SHEAR MEASUREMENTS
Rheological and mechanical properties of poly(α-methylstyrene-co-acrylonitrile)/poly(methyl methacrylate) blends in miscible and phase separated regimes of various morphologies 1547R
OSMOTIC COMPRESSIBILITY
Phase transitions in multicomponent liquid systems: The key role of electrolytes 591
OXIDATION OF SILICON CARBIDE (SIC)
High temperature oxidation of ceramic matrix composites 493
OXIDATION PROCESSES
Plasma–surface interactions in the processing of III–V semiconductor materials 1181
Advanced oxidation processes applied to effluent streams from an agrochemical industry 2271
OXIDATIVE DAMAGE TO DNA
DNA-mediated electron transfer: Chemistry at a distance 873
OXIDATIVE PHOSPHORYLATION
A thermodynamic principle for the coupled bioenergetic processes of ATP synthesis 639
OXO/HYDRO BRIDGED IRON-COPPER DINUCLEAR COMPLEXES
Copper–dioxygen complexes: Functional models for proteins 855
OXYGEN BINDING/ACTIVATION WITH TRIDENTATE LIGAND COMPLEXES
Copper–dioxygen complexes: Functional models for proteins 855
OXYGEN EVOLVING COMPLEX
A proposal for water oxidation in photosystem II 925
OXYGEN PLASMAS
Plasma–surface interactions in the processing of III–V semiconductor materials 1181
OZONATION
Advanced oxidation processes applied to effluent streams from an agrochemical industry 2271
OZONE
Dielectric barrier discharges and ozone synthesis 1169
How the atmosphere keeps itself clean and how this is affected by human activities 1319
PALLADIUM CATALYSTS
Asymmetric synthesis using palladium catalysts 411
Enantio- and regiocontrol in palladium- and tungsten-catalyzed allylic substitutions 1035
Regioselective additions to Π-allyl metal complexes 1083
Metal catalyzed hydrometalations and their applications in synthesis 1059
Some aspects of asymmetric catalysis with chiral ferrocenyl ligands 1477
Heterocycles via Pd catalysed molecular queuing processes. Relay switches and the maximisation of molecular complexity 1047
PALLADIUM COMPLEXES
Asymmetric synthesis using palladium catalysts 411
Fullerenes coordinated to transition metals: Synthetic and stereochemical study 789
PALLADIUM NUCLEOPHILES
New transformations of unsaturated hydrocarbon ligands coordinated with mono- and dinuclear palladium units 1105
PALLADIUM–PALLADIUM COMPLEXES
New transformations of unsaturated hydrocarbon ligands coordinated with mono- and dinuclear palladium units 1105
PARAMAGNETIC "PICKET-FENCE" PORPHYRIN
Iron porphyrins reinvistigated by new method: Mössbauer spectroscopy using synchrotron radiation 917
PARAMAGNETIC SUSCEPTIBILITY/MAGNETIZATION STUDIES
Studies of the electronic structure of polyradicals by means of their magnetic properties 1953
PARASITICIDES
Fermentation-derived compounds as a source of new products 335
PARTICLE UPTAKE
Clouds and pollution 1345
PCB IN WATER, SEDIMENTS, AND SLUDGE SAMPLES
Health risk assessment due to wastewater use in agriculture 2295
PENCICLOVIR
Practical syntheses of antiviral nucleosides 313
PENTACHLOROPHENOL AS AN UNCOUPLER OF OXYDATIVE PHOSPHORYLATION
Monitoring metabolic activities of small animals by means of microcalorimetry 695
PEPTIDE CLEAVAGE
Lantibiotics and microcins: novel posttranslational modifications of polypeptides 97
PEPTIDE NUCLEIC ACID
Structural and biological properties of peptide nucleic acid 105
PEPTIDES
Protein splicing: a novel form of gene expression and paradigm for self-catalyzed protein rearrangements 1
The conformational basis of asparagine-linked glycosylation 33
Proteolytic degradation of hemoglobin *in vivo*. Role in formation of tissue specific peptide pool 67
Modulation of membrane structure and function by hydrophobic mismatch between proteins and lipids 75
Improved gene delivery formulations and expression systems for enhanced transaction efficiency 83

© 1998 IUPAC

Liposomes: from membrane models to gene therapy 89
Lantibiotics and microcins: novel posttranslational modifications of polypeptides 97
Structural and biological properties of peptide nucleic acid 105
Recommendations for the presentation of NMR structures of proteins and nucleic acids 117*
Oxidative DNA damage mediated by metal–peptide complexes 275
Studies directed toward the synthesis of Vancomycin and related cyclic peptides 391
PEPTIDES/LIPID COMPLEXES
Modulation of membrane structure and function by hydrophobic mismatch between proteins and lipids 75
PERFORMANCE MARKINGS
Laboratory proficiency testing programmes 2309
PERMISSIBLE MAXIMUM LIMITS OF TOXIC SUBSTANCES
Health risk assessment due to wastewater use in agriculture 2295
PEROXYDATION
Advanced oxidation processes applied to effluent streams from an agrochemical industry 2271
PESTICIDES
Pesticides report 40: Bound xenobiotic residues in food commodities of plant and animal origin 1423R
Natural and Anthropogenic Environmental Oestrogens—an issue of special reports 1617
Neurotransmitters and the control of hypophyseal gonadal functions: possible implications of endocrine disruptors 1647
Environmental exposure, species differences and risk assessment 1829
Environmental endocrine disruptors 2319
pH MEASUREMENTS
pH measurements in non-aqueous and mixed solvents: Predicting pH(PS) of potassium hydrogen phthalate for alcohol–water mixtures 1419R
PHARMACEUTICAL OESTROGENS
Natural and Anthropogenic Environmental Oestrogens—an issue of special reports 1617
PHARMACOKINETIC BEHAVIOR IN HUMANS
Oestrogenic potency of nonylphenol *in vivo*—a case study to evaluate the relevance of human non-occupational exposure 1847
PHANE NOMENCLATURE I.
Phane parent names 1513*
PHASE DIAGRAMS
Nomenclature for phase diagrams with particular reference to vapour–liquid and liquid–liquid equilibria 2233R
PHASE RELATIONSHIP STUDIES
Enhancing materials design capability through understanding multicomponent phase relationships 509
PHASE SEPARATION DURING ANNEALING
Rheological and mechanical properties of poly(α-methylstyrene-co-acrylonitrile)/poly(methyl methacrylate) blends in miscible and phase separated regimes of various morphologies 1547R
PHASE TRANSITIONS
Phase transitions in multicomponent liquid systems: The key role of electrolytes 591
PHASESPACE MODELLING
Phasespace modelling of a radiofrequency plasma interacting with surfaces 1187
PHENOL ALKENYLATION REACTION
Direct vinylation reactions of phenols 1091
PHENOL VINYLATION REACTION
Direct vinylation reactions of phenols 1091
PHORBOL
The chemistry–medicine continuum: Synthetic, computer, spectroscopic and biological studies on new chemotherapeutic leads 539
PHOSPHIRANES AS LIGANDS
Coordination compounds with 3-, 4-, and 6-membered heterocycles containing phosphorus 819
PHOSPHOFRUCTOKINASE
Yeast chorismate and other allosteric enzymes 527
PHOSPHOROTHIOATE
Development of artificial ribonucleases 111
PHOTOACTIVATION
Visualising enzyme and ribozyme intermediates using fast diffraction and reaction trapping methods 17
PHOTOACTIVE HOST ASSEMBLIES
Photo- and redox-active host assemblies 2359
PHOTOASSISTED POLING
Photoinduced manipulations of photochromes in polymers: Anisotropy, modulation of the NLO properties and creation of surface gratings 2157
PHOTOCHEMICAL ACTIVITY
How the atmosphere keeps itself clean and how this is affected by human activities 1319
PHOTOCHEMICAL ELIMINATION
Metal dihydride complexes: Photochemical mechanisms for reductive elimination 2211
PHOTOCHEMICAL PROCESSES
An asymmetric induction principle and biomimetics with photons via electron transfer 2167
Interfacial photochemistry: fundamental and applications 2177
Metal dihydride complexes: Photochemical mechanisms for reductive elimination 2211
PHOTOCHEMICAL REACTIONS
Probing photochemical reactions with assistance of magnetic fields 827
Time, space and spectrally resolved photochemistry from ensembles to single molecules 2147
PHOTOCHROMISM
Photoinduced manipulations of photochromes in polymers: Anisotropy, modulation of the NLO properties and creation of surface gratings 2157
PHOTOCURRENT AND PHOTOPOTENTIAL SPECTROSCOPIES
Spectroelectrochemistry: A survey of *in situ* spectroscopic techniques 1395R
PHOTOELECTROCHEMISTRY OF SEMICONDUCTING DIAMOND
Interfacial photochemistry: fundamental and applications 2177
PHOTOELECTRON SPECTROSCOPY
Electronic structure contributions to function in bioorganic chemistry: The blue copper active site 799
PHOTOENOLIZATION OF METHYLNAPHTHOQUINONE
Kinetics of proton transfer reactions involving carbon 2221
PHOTOFABRICATION OF SURFACE RELIEF GRATINGS
Recent adavances in polumers for electronics and optics 1267
PHOTOINDUCED AMPHIPHILIC TITANIUM DIOXIDE SURFACES
Interfacial photochemistry: fundamental and applications 2177
PHOTOINDUCED DAMAGE TO DNA
DNA-mediated electron transfer: Chemistry at a distance 873
PHOTOINDUCED ELECTRON TRANSFER
An asymmetric induction principle and biomimetics with photons via electron transfer 2167
PHOTOLITHOGRAPHY
Concept transfer from the life sciences into materials science 419
PHOTOLYTIC REACTIONS
Product studies of gas-phase reactions of organic compounds 1335
PHOTOPHYSICAL TECHNIQUES
Time, space and spectrally resolved photochemistry from ensembles to single molecules 2147
PHOTOPROTEINS
Chemistry of photoproteins as interface between bioactive molecules and protein function 2085
PHOTOREGULATED INTERACTION
A photoresponsive molecular switch. Reaction of CO_2 and epoxide regulated by an aluminum porphyrin–stilbazole system 2365
PHOTORESPONSIVE MOLECULAR SWITCH
A photoresponsive molecular switch. Reaction of CO_2 and epoxide regulated by an aluminum porphyrin–stilbazole system 2365
PHOTOSWITCHING OF NLO PROPERTIES
Photoinduced manipulations of photochromes in polymers: Anisotropy, modulation of the NLO properties and creation of surface gratings 2157
PHOTOSYNTHESIS IN BACTERIA
Mimicking bacterial photosynthesis 2189
PHOTOTHERMAL METHODS
Spectroelectrochemistry: A survey of *in situ* spectroscopic techniques 1395R
PHYSICAL TRAPPING
Visualising enzyme and ribozyme intermediates using fast diffraction and reaction trapping methods 17
PHYSICO-CHEMICAL PROPERTIES
A photoresponsive molecular switch. Reaction of CO_2 and epoxide regulated by an aluminum porphyrin–stilbazole system 2365
PHYTO-OESTROGENS
Natural and Anthropogenic Environmental Oestrogens—an issue of special reports 1617
Neurotransmitters and the control of hypophyseal gonadal functions: possible implications of endocrine disruptors 1647
Structure/activity relationships 1725
Naturally occurring oestrogens in food Naturally occurring oestrogens in food 1759
Dietary phyto-oestrogens and cancer 1777

Environmental exposure, species differences and risk assessment 1829
Oestrogenic potency of nonylphenol *in vivo*—a case study to evaluate the relevance of human non-occupational exposure 1847
Clover phyto-oestrogens in sheep in Western Australia 1855
PITUITARY HORMONES
Comparative reproductive physiology of non-mammalian species 1657
PLAIT POINT
Phase transitions in multicomponent liquid systems: The key role of electrolytes 591
PLANAR CARBON
The planar carbon story 1977
PLANT CELL CULTURE METHODOLOGY
Biotechnology and synthetic chemistry—routes to clinically important compounds 2093
PLANT GROWTH REGULATORS
Acylated chitooligomers are molecular signals that mediate the symbiotic interactions between nitrogen-fixing bacteria and their host plants 55
PLANT OESTROGENS
Naturally occurring oestrogens in food Naturally occurring oestrogens in food 1759
PLANT-DERIVED CHEMICALS
Neurotransmitters and the control of hypophyseal gonadal functions: possible implications of endocrine disruptors 1647
PLASMA DIAGNOSIS
Plasma diagnosis by high-resolution spectroscopy of transient molecules 1145
PLASMA ENHANCED CHEMICAL VAPOR DEPOSITION
Process control of organosilicon plasmas for barrier film preparations 1203
PLASMA GENERATORS
Water-stabilized plasma generators 1157
PLASMA IGNITION AND LIGHTING PROCESSES
Eulerian and Lagrangian modelling of dust-laden plasma jets 1217
PLASMA SOURCE ION IMPLANTATION ENHANCED DEPOSITION
Synthesis of ceramic films on metallic substrates using magnetron-sputtering deposition synchro-enhanced by microwave ECR plasma source ion implantation under high vacuum conditions 1199
PLASMA SPRAYING
Water-stabilized plasma generators 1157
Modeling droplet impact in plasma spray processes 1209
Eulerian and Lagrangian modelling of dust-laden plasma jets 1217
PLASMA TORCHES
Water-stabilized plasma generators 1157
Fluid dynamic modelling of electric arcs for industrial applications 1163
PLASMA-SURFACE INTERACTIONS
Plasma–surface interactions in the processing of III–V semiconductor materials 1181
PLATINUM ANTICANCER DRUGS
Metal complexes in medicine: Design and mechanism of action 863
PLATINUM COMPLEXES
Fullerenes coordinated to transition metals: Synthetic and stereochemical study 789
The effects of N7-coordinated cis-diammine-platinum(II) on the acid-base properties of guanine derivatives 845
POLAR INTERACTION OF CLUSTERING SUGARS AT INTERFACE AND IN SOLUTION
Molecular delivery systems using macrocyclic sugar clusters 2379
POLARIZED LIGHT
Photoinduced manipulations of photochromes in polymers: Anisotropy, modulation of the NLO properties and creation of surface gratings 2157
POLLUTION GRADIENT
Monitoring eutrophication and pollution in estuarine environments—focusing on the use of benthic communities 2313
POLY(ETHYLENE GLYCOL)
Poly(ethylene glycol) block copolymers by redox process: Kinetics, synthesis and characterization 1245
POLY(METHYL METHACRYLATE)
New concepts in controlled drug delivery 1283
POLYANILINE COLLOID PARTICLES
From Euclidean to fractal geomety: The case of disintegration of polyaniline colloid particles 1263
POLYBOROSILAZANES
Precursor-derived Si-B-C-N ceramics 439
POLYCHLORINATED BIPHENYLS
Neurotransmitters and the control of hypophyseal gonadal functions: possible implications of endocrine disruptors 1647
POLYCONDENSATION METHODS
Star shaped and hyperbranched aromatic polyesters 1235
Preparation and structure of polyether-block containing polymers
Preparation and structure of polyether-block containing polymers 1239
POLYCROWNETHERS
Anodic generation of new ionophoric conducting polymers 1253
POLYCYCLIC ETHERS
Metal-oxo induced syn-oxidative polycyclizations of hydroxypolyenes: Biomimetic synthesis of polycyclic ether natural products 355
POLYENE BOLAAMPHIPHILES
Rigidity in synkinetic molecular monolayers of functional lipids containing Ångstrom Gaps 2385
POLYETHER RESINS
Anodic generation of new ionophoric conducting polymers 1253
POLYETHER RING SIZE
Metal ion extraction by lariat ethers with 'tunable' proton-ionizable groups 2393
POLYETHER-BLOCK CONTAINING POLYMERS
Preparation and structure of polyether-block containing polymers.
Preparation and structure of polyether-block containing polymers 1239
POLYKETIDE POLYETHER SYNTHESIS
Metal-oxo induced syn-oxidative polycyclizations of hydroxypolyenes: Biomimetic synthesis of polycyclic ether natural products 355
POLYKETIDES
Fermentation-derived compounds as a source of new products 335
POLYMER BLENDS
Reactively compatibilized polymer blends: Interfacial chemical reactions during melt-extrusion 1289
POLYMER FILM
Time, space and spectrally resolved photochemistry from ensembles to single molecules 2147
Photoinduced manipulations of photochromes in polymers: Anisotropy, modulation of the NLO properties and creation of surface gratings 2157
POLYMER PARTICLE OXIDATION
Treatment of dust particles in an RF plasma monitored by Mie scattering rotating compensator ellipsometry 1151
POLYMERIC LIPOSOMES
New concepts in controlled drug delivery 1283
POLYMERIC MATERIALS
Nanogels and microgels: The new polymeric materials playground 1271
POLYMERIZATION TECHNIQUES
Synthesis and characterization of polyurethane microspheres 1295
POLYMERS FOR ELECTRONICS AND OPTICS
Recent adavances in polumers for electronics and optics 1267
POLYMETALLOCENE DENDRIMERS
Redox-active organotransition-metal dendrimers: The dendritic effect in supramolecular recognition 809
POLYMORPHISM
Biodiversity and intraspecific genetic variation 2079
POLYNUCLEAR CLUE COMPLEXES
Metal basicity and cooperative effects in the reactions of dinuclear pyrazolato rhodium complexes 779
POLYNUCLEOTIDE
Recommendations for the presentation of NMR structures of proteins and nucleic acids 117*
Interaction of bleomycin with DNA 307
POLYOLEFINS
New polyolefins by metallocene catalysts 1229
POLYPEPTIDES
Protein splicing: a novel form of gene expression and paradigm for self-catalyzed protein rearrangements 1
A structural view of ligand binding to the retinoid receptors 41
Lantibiotics and microcins: novel posttranslational modifications of polypeptides 97
Recommendations for the presentation of NMR structures of proteins and nucleic acids 117*
POLYSACCHARIDE ANALOGUE SYNTHESIS
An approach to the synthesis of polysaccharide analogues 425
POLYTRIPHENYLENES
Anodic generation of new ionophoric conducting polymers 1253
POLYURETHANE MICROSPHERES
Synthesis and characterization of polyurethane microspheres 1295
POPULATION GROWTH
New challenges in environmental chemistry 2259
PORPHYRINS
Solving challenging bioorganic problems by exciton coupled CD 377

Guidelines for calibration in analytical chemistry—Part 1: Fundamentals and single component calibration, 993–1014R
Guidelines for presentation of methodological choices in the publication of computational results. A. *Ab initio* electronic structure calculations, 1015–1018R
Guidelines for publication of research results from empirical force field calculations, 2047–2049R
History of the recommended atomic-weight values form 1882 to 1997: A comparison of differences from current values to the estimated uncertainties of earlier values, 237–257R
Isotopic compositions of the elements 1997, 217–235R
Natural and anthropogenic environmental oestrogens: the scientific basis for risk assessment, 1617–1865R
Nomenclature of fused and bridged fused ring systems, 143–216*
Nomenclature of phase diagrams with particular reference to vapour–liquid and liquid–liquid, 2233–2257R
Nomenclature, symbols, units and their usage in spectrochemical analysis—XIV. Laser-based atomic spectroscopy: proposal for a new notation, 517–526*
pH measurements in non-aqueous and mixed solvents: predicting pH(PS) of potassium hydrogen o-phthalate for alcohol–water mixtures, 1419–1422R
Phane nomenclature: Part I, 1513–1545*
Recommendations for the presentation of NMR structures of proteins and nucleic acids, 117–142*
Rheological and mechanical properties of poly(α-methylstyrene-*co*-acronytrile)/poly(methyl methacrylate) blends in miscible and phase separated regimes of various morphologies. Part 1: Characterization of constituents, blend preparation and overview on blend morphology, 1547–1566R
Specification of components, methods and parameters in Fourier transform spectroscopy by Michelson and related interferometers, 2039–2045R
Spectroelectrochemistry—A survey of *in situ* spectrochemistry techniques, 1395–1414R
The determination of iodine species in environmental and biological samples, 1567–1584R
The determination of mercury species in environmental and biological samples, 1585–1615R
REDOX BEHAVIOR OF FEMTOMOLE QUANTITIES OF METALLIC COMPLEXES
Surface electrochemistry of inorganic complexes 755
REDOX TITRATIONS
Structural bases for the catalytic mechanism of NiFe hydrogenase 25
REDOX-ACTIVE HOST ASSEMBLIES
Photo- and redox-active host assemblies 2359
REDOX-ACTIVE ORGANOTRANSITION-METAL DENDRIMERS
Redox-active organotransition-metal dendrimers: The dendritic effect in supramolecular recognition 809
REDUCTIVE ELIMINATION
Metal dihydride complexes: Photochemical mechanisms for reductive elimination 2211
REFLECTION HIGH ENERGY ELECTRON DIFFRACTION
Plasma-surface interactions in the processing of III–V semiconductor materials 1181
REFRACTORY (HOT) CATHODES
Cold cathode arc attachment: The importance of the high local pressure 1175
REFRACTORY OXIDE COATINGS
High temperature oxidation of ceramic matrix composites 493
REGIOSELECTIVE ADDITIONS
Smart ruthenium catalysts for the selective catalytic transformations of alkynes 1065
Regioselective additions to Π-allyl metal complexes 1083
REGIOSELECTIVE SYNTHESES OF LACTONES AND LACTAMS
New catalysts and methods for highly enantioselective metal carbene reactions 1123
REGIOSELECTIVITY
Carbohydrates to densely functionalized carbocycles: 'armed and disarmed' effects in an approach to tetrodotoxin 285
Studies on the syntheses and biological activities of isonucleosides 435
Enantio- and regiocontrol in palladium- and tungsten-catalyzed allylic substitutions 1035
Heterocycles via Pd catalysed molecular queuing processes. Relay switches and the maximisation of molecular complexity 1047
Smart ruthenium catalysts for the selective catalytic transformations of alkynes 1065
An asymmetric induction principle and biomimetics with photons via electron transfer 2167
REGIOSLEECTIVE HYDROSTANNATION OF ALLENIC ALCOHOLS AND ETHERS
Metal catalyzed hydrometalations and their applications in synthesis 1059
RELAXATION CONTINUUM
Phasespace modelling of a radiofrequency plasma interacting with surfaces 1187
REMOTE AND CONTINUOUS MONITORING
New challenges in environmental chemistry 2259
REPARTITION OF SOLUBLE AND INSOLUBLE SPECIES
Repartition of various soluble and insoluble species in supersaturated solutions 1921
REPRODUCTIVE ENDOCRINE SYSTEM
Comparative physiology of the reproductive endocrine system in laboratory rodents and humans 1633
REPRODUCTIVE HORMONES
Comparative reproductive physiology of non-mammalian species 1657
RESINIFERATOXIN
The chemistry–medicine continuum: Synthetic, computer, spectroscopic and biological studies on new chemotherapeutic leads 539
RESONANCE RAMAN EXPERIMENTS
Structure–activity relation of horseradish peroxidases as studied with mutations at heme distal and proximal sites 911
RESORCIN[4]ARENES
Supramolecular chemistry at interfaces 1985
RESPONSE REACTIONS
Response reactions: An interpretative concept in chemical thermodynamics 583
RETINOID RECEPTORS
A structural view of ligand binding to the retinoid receptors 41
RETRO-CYCLOADDITIONS
Retro-cycloadditions and sigmatropic shifts: the C_7H_8 and C_7H_{10} potential energy surfaces 1947
RETRO-DIELS-ALDER REACTIONS
Retro-cycloadditions and sigmatropic shifts: the C_7H_8 and C_7H_{10} potential energy surfaces 1947
REVERSE TRANSCRIPTASE INHIBITORS
Recent developments in the chemotherapy of HIV infections 567
RHIZOBIA
Acylated chitooligomers are molecular signals that mediate the symbiotic interactions between nitrogen-fixing bacteria and their host plants 55
RHODIUM CATALYSIS
Some aspects of asymmetric catalysis with chiral ferrocenyl ligands 1477
RHODOPSIN
Solving challenging bioorganic problems by exciton coupled CD 377
RIBONUCLEASES
Development of artificial ribonucleases 111
RIBONUCLEOTIDE REDUCTASE
The high valent nonheme Fe_2O_2 diamond core: Comparisons with the heme ferryl 947
Reactivity of diiron(II) complexes with molecular oxygen 955
RIGID MONOLAYERS
Rigidity in synkinetic molecular monolayers of functional lipids containing Ångstrom Gaps 2385
RISK ASSESSMENT
Natural and Anthropogenic Environmental Oestrogens—an issue of special reports 1617
New challenges in environmental chemistry 2259
RITONAVIR
Recent developments in the chemotherapy of HIV infections 567
RNA
Protein splicing: a novel form of gene expression and paradigm for self-catalyzed protein rearrangements 1
Visualising enzyme and ribozyme intermediates using fast diffraction and reaction trapping methods 17
Improved gene delivery formulations and expression systems for enhanced transaction efficiency 83
Structural and biological properties of peptide nucleic acid (PNA) 105, Development of artificial ribonucleases 111
Redesigning nucleic acids 263
Studies in biomimetic chemistry 267
Enhancing DNA triplex stability via nucleobase modification 289
Interaction of bleomycin with DNA 307
Biodiversity and intraspecific genetic variation 2079

ROTARY KILN
High temperature chemical aspects of waste disposal and environmental clean-up 461
ROTATING COMPENSATOR ELLIPSOMETRY
Treatment of dust particles in an RF plasma monitored by Mie scattering rotating compensator ellipsometry 1151
ROTAXANES
Concept transfer from the life sciences into materials science 419
RUTHENIUM AND TITANIUM TRANSFERRIN COMPLEXES
Metal complexes in medicine: Design and mechanism of action 863
RUTHENIUM CATALYSIS
Smart ruthenium catalysts for the selective catalytic transformations of alkynes 1065
SALINITY STRESS
Monitoring eutrophication and pollution in estuarine environments—focusing on the use of benthic communities 2313
SALTING-OUT AGENTS
Ion-pair extraction of metalloporphyrins into a mixture of acetonitrile with water 1925
SALVIA MILTIORRHIZA
Biologically active components from traditional Chinese medicines 547
SAQUINAVIR
Recent developments in the chemotherapy of HIV infections 567
SCALE FORMATION
Repartition of various soluble and insoluble species in supersaturated solutions 1921
SCANNING TUNNELING MICROSCOPY
Time, space and spectrally resolved photochemistry from ensembles to single molecules 2147
SCHISANDRA CHINENSIS
Biologically active components from traditional Chinese medicines 547
SCREENING AND TESTING
Conclusions and recommendations 1863
SECOND LAW OF THERMODYNAMICS
Thermodynamics and biology 579
SECONDARY ION MASS SPECTROMETRY (SIMS)
Supramolecular chemistry at interfaces 1985
SELECTIVE CATALYTIC ALKYNE TRANSFORMATION
Smart ruthenium catalysts for the selective catalytic transformations of alkynes 1065
SELF-ASSEMBLY PROCESSES
Concept transfer from the life sciences into materials science 419
SELF-LIMITING SURFACE KINETICS
Plasma–surface interactions in the processing of III–V semiconductor materials 1181
SELF-SELECTED BINDING
Concept transfer from the life sciences into materials science 419
SEMICONDUCTOR MATERIALS
Plasma–surface interactions in the processing of III–V semiconductor materials 1181
SEMICONDUCTOR/LIQUID AND GAS INTERFACES
Interfacial photochemistry: fundamental and applications 2177
SENSING APPLICATIONS
Supramolecular chemistry at interfaces 1985
SENSITIVITY COEFFICIENTS
Response reactions: An interpretative concept in chemical thermodynamics 583
SENSORS AND BIOSENSORS
Toxic trace metal speciation: importance and tools for environmental and biological analysis 2281
SEQUENCING OF cDNA LIBRARIES
The impact of genomics on medicinal chemistry 359
SERTOLI CELL REPLICATION
Environmental oestrogens and male infertility 1685
SERTRALINE SYNTHESIS
Metal catalyzed hydrometalations and their applications in synthesis 1059
SESQUITERPENES
Recent results on structural chemistry of new natural products from Chinese herbal medicine 431
SEX DETERMINATION AND SEXUAL DIFFERENTIATION
Comparative reproductive physiology of non-mammalian species 1657
Environmental exposure, species differences and risk assessment 1829
SEX STEROIDS
Comparative physiology of the reproductive endocrine system in laboratory rodents and humans 1633
Review of suggested testing methods for endocrine-disrupting chemicals 1805
SHELF-LIFE CALCULATION
Thermodynamic and kinetic parameters from isothermal heat conduction microcalorimetry 633
SHIKIMATE DERIVATIVES
Natural products and evolutionary ecology 299
SIALIC ACID-CONTAINING GLYCOSPHINGOLIPIDS
Ganglioside research: New trends and reflections 533
Si-B-C-N CERAMICS
Precursor-derived Si-B-C-N ceramics 439
SIGMATROPIC SHIFTS
Retro-cycloadditions and sigmatropic shifts: the C_7H_8 and C_7H_{10} potential energy surfaces 1947
SIGNAL TRANSDUCTION
Cell regulatory function of glycophingolipids: carbohydrate recognition and biosignaling 49
Ganglioside research: New trends and reflections 533
The chemistry–medicine continuum: Synthetic, computer, spectroscopic and biological studies on new chemotherapeutic leads 539
SIGNALING MOLECULES
Acylated chitooligomers are molecular signals that mediate the symbiotic interactions between nitrogen-fixing bacteria and their host plants 55
SILANE RF DISCHARGE PLASMA
Plasma diagnosis by high-resolution spectroscopy of transient molecules 1145
SILICON CARBIDE (SIC) MATRICES
High temperature oxidation of ceramic matrix composites 493
SILICON DIOXIDE FORMATION
High temperature oxidation of ceramic matrix composites 493
SILICON NITRIDE CERAMICS
High temperature oxidation of ceramic matrix composites 493

SILICON TETHERED REACTIONS
Chemical synthesis of oligosaccharide mimetics 407
SILICONMETAL FINES
Thermal plasma process development in Norway 1223
SILOXYARYLCARBENES
Production of carbenium ions from carbenes by protonation 2031
SILYL EFFECTS IN BICYCLOBUTONIUM IONS
Recent advances in the experimental and computational characterization of carbocations: silyl effects in bicyclobutonium ions 2015
SILYLATED BORAZINE DERIVATIVES
Precursor-derived Si-B-C-N ceramics 439
SIMPLE IONIC REACTION MECHANISMS
Recent advances in the energetics and mechanisms of gas-phase ionic reactions 1969
SINGLE CARBONATES
Solubilities of metal carbonates 1913
SINGLE CRYSTAL X-RAY DIFFRACTION
Creating regular arrangements of nucleobases through metal ion coordination and H bond formation 977
SINGLE ELECTRON TRANSFER (SET)
The hydrophobic effect as a mechanistic tool 1933
SINGLE-PHASE PLASMA JETS
Eulerian and Lagrangian modelling of dust-laden plasma jets 1217
SITE SELECTION BY ENANTIOMERS
Stereo- and site selection by enantiomers in electron-transfer reactions involving native and recombinant metalloproteins 985
SITE-DIFFERENTIATED CLUSTERS
[1:3] Site-differentiated and sulfide-bridged cubane clusters in chemistry and biology 931
SITOSTEROL
Metabolism and fate of xenoestrogens in man 1747
SMALL SINGLET–TRIPLET ENERGY GAPS IN DIRADICALS
Studies of the electronic structure of polyradicals by means of their magnetic properties 1953
SOLAR RADIATION
How the atmosphere keeps itself clean and how this is affected by human activities 1319
An asymmetric induction principle and biomimetics with photons via electron transfer 2167
SOLID SOLVATE ADDUCTS OF FULLERENES
Solubility and molecular state of C_{60} and C_{70} in solvents and solvent mixtures 1881
SOLUBILITIES OF METAL CARBONATES
Solubilities of metal carbonates 1913

© 1998 IUPAC

SOLUBILITY AND PARTICLE SIZE
The dissolution and growth of sparingly soluble inorganic salts: A kinetics and surface energy approach 1867
SOLUBILITY CONSTANTS
Solubilities of metal carbonates 1913
SOLUBILITY IN SOLVENT MIXTURES
Solubility and molecular state of C_{60} and C_{70} in solvents and solvent mixtures 1881
SOLUBILITY OF GASES IN WATER
Solubility of gases in water: Correlation between solubility and the number of water molecules in the first solvation shell 1895
SOLUBILITY PHENOMENA
Solubility problems relating to lithium battery electrolytes 1905, Solubilities of metal carbonates 1913
SOLUTION PHASES
Thermodynamic modelling of solution and ordered phases 449
SOLUTION THERMODYNAMICS
An overview on the solution thermodynamics of lower rim functionalised calixarene derivatives and metal cations. New derivatives containing amino and thioalkyl functional groups 769
SOLVENT ACCESSIBLE SURFACE (SAS)
Solubility of gases in water: Correlation between solubility and the number of water molecules in the first solvation shell 1895
SOLVENT EXTRACTION
Ion-pair extraction of metalloporphyrins into a mixture of acetonitrile with water 1925
Tailoring molecular assemblies for metal ion bending 2345
Metal ion extraction by lariat ethers with 'tunable' proton-ionizable groups 2393
SOLVENT INTERACTIONS
Structural modification and solvent interactions in solvolytic reactions of open-chain compounds 2023
SOLVENT REACTIVITY
Solubility problems relating to lithium battery electrolytes 1905
SOLVENT SELECTIVITY
Structural modification and solvent interactions in solvolytic reactions of open-chain compounds 2023
SOLVENT STRUCTURE
Ion-pair extraction of metalloporphyrins into a mixture of acetonitrile with water 1925
SOLVENT-EXCLUDING SURFACE (SES)
Solubility of gases in water: Correlation between solubility and the number of water molecules in the first solvation shell 1895
SOLVOLYSIS RATE CONSTANTS OF CARBOCATIONS
Reactivities and selectivities of free and metal-coordinated carbocations 1993
SOLVOLYTIC REACTIONS OF OPEN-CHAIN COMPOUNDS
Structural modification and solvent interactions in solvolytic reactions of open-chain compounds 2023
SOOT PARTICLES
Heterogeneous processes involving atmospheric particulate matter 1353
SORPTION
Factors influencing biodegradation of synthetic organic chemicals in natural and engineered aquatic environments 1363
SPECIAL CRITICAL POINTS
Phase transitions in multicomponent liquid systems: The key role of electrolytes 591
SPECIES DIFFERENCES
Environmental exposure, species differences and risk assessment 1829
SPECTROCHEMICAL PROCESSES
Laser-based atomic spectroscopy: a new notation for spectrochemical processes 517*
SPECTROSCOPIC ELLIPSOMETRY
Plasma–surface interactions in the processing of III–V semiconductor materials 1181
SPERMATOGENESIS
Comparative physiology of the reproductive endocrine system in laboratory rodents and humans 1633
SPHINGOSINES
Solving challenging bioorganic problems by exciton coupled CD 377
SPIN FRUSTRATION AND COMPETING INTERACTION
Studies of the electronic structure of polyradicals by means of their magnetic properties 1953
SPINACH FERREDOXIN-THIOREDOXIN REDUCTASE
Novel roles for Fe-S clusters in stabilizing or generating radical intermediates 939
SPINACH PLASTOCYANIN
Stereo- and site selection by enantiomers in electron-transfer reactions involving native and recombinant metalloproteins 985
SPINOSYNS
Fermentation-derived compounds as a source of new products 335
SPIROALKAPLANES
The planar carbon story 1977
SPIROPYRANS
Photoinduced manipulations of photochromes in polymers: Anisotropy, modulation of the NLO properties and creation of surface gratings 2157
STABILITY OF MELT
Rheological and mechanical properties of poly(α-methylstyrene-co-acrylonitrile)/poly(methyl methacrylate) blends in miscible and phase separated regimes of various morphologies 1547R
STAR SHAPED AROMATIC POLYESTERS
Star shaped and hyperbranched aromatic polyesters 1235
STAVUDINE
Recent developments in the chemotherapy of HIV infections 567
STEADY STATE ACCUMULATION
Visualising enzyme and ribozyme intermediates using fast diffraction and reaction trapping methods 17
STEADY STATE BEHAVIOR IN ACIDIC BROMATE SYSTEMS
Nonlinear dynamics in closed biological and chemical systems 645
STEREOSCOPICALLY DETECTIBLE INTERMEDIATES
An asymmetric induction principle and biomimetics with photons via electron transfer 2167
STEREOSELECTION BY ENANTIOMERS
Stereo- and site selection by enantiomers in electron-transfer reactions involving native and recombinant metalloproteins 985
STEREOSELECTIVE HYDROZIRCONATIONS OF INTERNAL ALKYNES AND ALKENES
Kinetic vs. thermodynamic control in hydrozirconation reactions 1077
STEREOSELECTIVE SYNTHESIS
Chemical synthesis of oligosaccharide mimetics 407
An asymmetric induction principle and biomimetics with photons via electron transfer 2167
STEREOSELECTIVE TRANSFORMATIONS
Carbohydrates to densely functionalized carbocycles: 'armed and disarmed' effects in an approach to tetrodotoxin 285
STEREOSELECTIVITY
Heterocycles via Pd catalysed molecular queuing processes. Relay switches and the maximisation of molecular complexity 1047
Recent advances in the synthesis of carbohydrate mimics 1495
STEROID NEGATIVE FEEDBACK
Environmental oestrogens and male infertility 1685
STEROIDAL ALKALOIDS
New natural products from medicinal plants of Pakistan 385
STEROIDAL LACTONES
New natural products from medicinal plants of Pakistan 385
STEROIDOGENESIS
Comparative physiology of the reproductive endocrine system in laboratory rodents and humans 1633
STEROIDS
Comparative reproductive physiology of non-mammalian species 1657
STILLE COUPLING REACTION WITH ALKYL HALIDES
The role of complexes in defining organometallic reaction mechanisms 1939
STOICHIOMETRIC CARBONATE PHASES
Solubilities of metal carbonates 1913
STOICHIOMETRIC PROCESSES
Low-valent transition metal induced C–C-bond formations: Stoichiometric reactions evolving into catalytic processes 1071
STONE DECAY BY AIR POLLUTION
Cultural heritage and the environment 2327
STRAND SCISSION
Oxidative DNA damage mediated by metal–peptide complexes 275
STREPTOMYCIN
A search for novel chemotherapy against tuberculosis amongst natural products 365
STRUCTURAL CHEMISTRY
Recent results on structural chemistry of new natural products from Chinese herbal medicine 431
STRUCTURAL MODIFICATION
Structural modification and solvent interactions in solvolytic reactions of open-chain compounds 2023
STRUCTURAL REARRANGEMENTS
From D-camphor to the taxanes. Highly concise rearrangement-based approaches to taxusin and taxol 1449
STRUCTURE ACTIVITY RELATIONSHIPS (SAR)
Studies on the chemistry of Taxol® 331
Chemical synthesis of oligosaccharide mimetics 407

© 1998 IUPAC

Structure–activity relation of horseradish peroxidases as studied with mutations at heme distal and proximal sites 911
Structure/activity relationships 1725
Issues associated with the validation of *in vitro* and *in vivo* methods for assessing endocrine disrupting chemicals 1735
Review of suggested testing methods for endocrine-disrupting chemicals 1805
STRUCTURE CALCULATION
Recommendations for the presentation of NMR structures of proteins and nucleic acids 117*
STRUCTURE/FUNCTION ANALYSIS
Principles of risk assessment 1671
STRUCTURE-BASED COMBINATORIAL LIBRARY
Structure-based inhibitor design for CDK2, a cell cycle controlling protein kinase 555
STRUCTURE-BASED INHIBITOR DESIGN
Structure-based inhibitor design for CDK2, a cell cycle controlling protein kinase 555
STRUCTURE-PROPERTY RELATIONSHIPS
Utilization of structure–property relationships as a guide for achievement of high optical purity in aryloxyphenoxypropionates 325
STYPOLDIONE
An asymmetric induction principle and biomimetics with photons via electron transfer 2167
SUBSTITUENT EFFECTS
Intrinsic barriers to the formation and reaction of carbocations 2007
SUBSTITUTIONAL SOLUTIONS
Thermodynamic modelling of solution and ordered phases 449
SUGAR CLUSTER COMPOUNDS
Molecular delivery systems using macrocyclic sugar clusters 2379
SUGAR MIMICS
Sugar mimics from sugar lactones 279
SULFIDE-BRIDGED DOUBLE CUBANES
[1:3] Site-differentiated and sulfide-bridged cubane clusters in chemistry and biology 931
SULPHATE REDUCING BACTERIA (SRB)
Interfacial phenomena in biocorrosion 627
SUPER HIGH-SPIN MOLECULES
Studies of the electronic structure of polyradicals by means of their magnetic properties 1953
SUPERNUCLEOPHILE ISOCYANIDE PYRAZOLATO COMPLEXES
Metal basicity and cooperative effects in the reactions of dinuclear pyrazolato rhodium complexes 779
SUPERSATURATED SOLUTIONS
Repartition of various soluble and insoluble species in supersaturated solutions 1921
SUPRAMOLECULAR CHEMISTRY
Suprasupermolecular chemistry: the chemistry within the dendrimer 2337
SUPRAMOLECULAR CHEMISTRY AT INTERFACES
Supramolecular chemistry at interfaces 1985
SUPRAMOLECULAR NETWORKS
Copper(I) halide supramolecular networks linked by N-heterocyclic donor bridging ligands 2351
SURFACE DISCHARGES (SD)
Dielectric barrier discharges and ozone synthesis 1169
SURFACE ELECTROCHEMISTRY OF INORGANIC COMPLEXES
Surface electrochemistry of inorganic complexes 755
SURFACE GRATINGS
Photoinduced manipulations of photochromes in polymers: Anisotropy, modulation of the NLO properties and creation of surface gratings 2157
SURFACE MODELS
Simulation of surface reactions 477
SURFACE MODIFICATIONS
Plasma–surface interactions in the processing of III–V semiconductor materials 1181
SURFACE PRASMON RESONANCE (SPR)
Molecular delivery systems using macrocyclic sugar clusters 2379
SURFACE RAMAN SPECTROSCOPY
Spectroelectrochemistry: A survey of *in situ* spectroscopic techniques 1395R
SURFACE REACTIONS
Simulation of surface reactions 477
SURFACTANT SYSTEM AT SOLID/LIQUID INTERFACE
Thermodynamics of adsorption of surfactants at solid–liquid interface 621
SUSPENSION POLYMERIZATION
Synthesis and characterization of polyurethane microspheres 1295
SUSTAINABLE DEVELOPMENT
Strategies for sustainable development—experiences from a university cooperation in the Baltic Sea region 2263
SWITCHING MONOLAYER
Supramolecular chemistry at interfaces 1985
SYMPLECTIN
Chemistry of photoproteins as interface between bioactive molecules and protein function 2085
SYNKINETIC MOLECULAR MONOLAYERS
Rigidity in synkinetic molecular monolayers of functional lipids containing Ångstrom Gaps 2385
SYNTHESIS OF CARBOHYDRATE MIMICS
Recent advances in the synthesis of carbohydrate mimics 1495
SYNTHESIS OF HYDROGEN BONDED BOX-LIKE ASSEMBLIES
Non-covalent synthesis of organic nanostructures 1459
SYNTHETIC HORMONES
Environmental exposure, species differences and risk assessment 1829
TAXANES
From D-camphor to the taxanes. Highly concise rearrangement-based approaches to taxusin and taxol 1449
TAXOL
Studies on the chemistry of Taxol® 331
The chemistry–medicine continuum: Synthetic, computer, spectroscopic and biological studies on new chemotherapeutic leads 539
From D-camphor to the taxanes. Highly concise rearrangement-based approaches to taxusin and taxol 1449
TAXUS BREVIFOLIA
Studies on the chemistry of Taxol® 331
TAXUSIN
From D-camphor to the taxanes. Highly concise rearrangement-based approaches to taxusin and taxol 1449

Probing photochemical reactions with assistance of magnetic fields 827
TRANSITION METAL SULFUR CHEMISTRY
Transition metal sulfur chemistry and its relevance to molybdenum and tungsten enzymes 889
TRANSITION-STATE-THEORY (TST) CALCULATIONS
Simulation of surface reactions 477
TRANSMEMBRANE PROTON PUMPING
Mimicking bacterial photosynthesis 2189
TRANSMEMBRANE RECEPTORS (7TMR'S)
The impact of genomics on medicinal chemistry 359
TRANSMETALLATION
New transformations of unsaturated hydrocarbon ligands coordinated with mono- and dinuclear palladium units 1105
TRANSMISSION MICROSCOPY (TM)
Time, space and spectrally resolved photochemistry from ensembles to single molecules 2147
TRANSPURINATION
Practical syntheses of antiviral nucleosides 313
TRIBUTYLTIN (TBT)
Environmental exposure, species differences and risk assessment 1829
TRITERPENOIDS
Biologically active components from traditional Chinese medicines 547
TRITHIOLENE-DITHIOLENE CONVERSION
Transition metal sulfur chemistry and its relevance to molybdenum and tungsten enzymes 889
TROPICAL BIOLOGY
Biodiversity research and training program in Thailand 2073
TROPOSPHERIC DEGRADATION
Gas-phase degradation of organic compounds in the troposphere 1327
Product studies of gas-phase reactions of organic compounds 1335
TROPOSPHERIC GASES
How the atmosphere keeps itself clean and how this is affected by human activities 1319
TRYPANOSOMA
Synthesis of oligosaccharides of biological importance 293
TRYPTANTHRIN
A search for novel chemotherapy against tuberculosis amongst natural products 365

© 1998 IUPAC

TUBERCULOSIS
A search for novel chemotherapy against tuberculosis amongst natural products 365
TUNABLE PROTON-IONIZABLE GROUPS
Metal ion extraction by lariat ethers with 'tunable' proton-ionizable groups 2393
TUNDISH HEATING
Fluid dynamic modelling of electric arcs for industrial applications 1163
TUNGSTEN ENZYMES
Transition metal sulfur chemistry and its relevance to molybdenum and tungsten enzymes 889
TUNGSTEN-ALKENYL AND -PROPARGYL COMPOUNDS
Tungsten-alkynyl and -propargyl compounds for organic syntheses 1111
TUNGSTEN-ALKYNOLS IN FURAN AND PYRAN SYNTHESIS
Tungsten-alkynyl and -propargyl compounds for organic syntheses 1111
TUNGSTEN-CATALYZED ALLYLIC SUBSTITUTIONS
Enantio- and regiocontrol in palladium- and tungsten-catalyzed allylic substitutions 1035
TURBIDITY MEASUREMENT
Critical phenomena of chain-molecule solutions 609
TURKISH MEDICINAL PLANTS
Biological activities of some Turkish medicinal plants 403
TYLOSIN
Fermentation-derived compounds as a source of new products 335
ULTRAFAST SPECTROSCOPY
Metal dihydride complexes: Photochemical mechanisms for reductive elimination 2211
ULTRAFINE SILICA PARTICLES
Thermal plasma process development in Norway 1223
ULTRAMICROFILTRATION
Toxic trace metal speciation: importance and tools for environmental and biological analysis 2281
ULTRA-TRACE ANALYSIS
New challenges in environmental chemistry 2259
ULTRAVIOLET RAYS
How the atmosphere keeps itself clean and how this is affected by human activities 1319
UPTAKE OF GASES
Clouds and pollution 1345
UROLITHIASIS
Repartition of various soluble and insoluble species in supersaturated solutions 1921
U-SHAPED RECEPTOR FOR UREA
Binding biomolecules with designed, hydrogen-bonding receptors 2371
UV RADIATION
How the atmosphere keeps itself clean and how this is affected by human activities 1319
Advanced oxidation processes applied to effluent streams from an agrochemical industry 2271
UV/VIS REFLECTANCE SPECTROSCOPY
Spectroelectrochemistry: A survey of *in situ* spectroscopic techniques 1395R
UV-B RADIATION
How the atmosphere keeps itself clean and how this is affected by human activities 1319
VAN DER WAALS SURFACE (WS)
Solubility of gases in water: Correlation between solubility and the number of water molecules in the first solvation shell 1895
VANCOMYCIN SYNTHESIS
Studies directed toward the synthesis of Vancomycin and related cyclic peptides 391
VAPOR-LIQUID EQUILIBRIA
Nomenclature for phase diagrams with particular reference to vapour–liquid and liquid–liquid equilibria 2233R
VEGETATION DAMAGE IN THE TROPICS
Performance and results of a six-year German/Brazilian research project in the industrial area of Cubatão/SP Brazil 2287
VESICLES
Liposomes: from membrane models to gene therapy 89, Reactivity and selectivity in aggregate systems 1961
VIBRATION-ROTATION INFRARED SPECTRA
Plasma diagnosis by high-resolution spectroscopy of transient molecules 1145
VINCLOZOLIN
Environmental endocrine disruptors 2319
VIRAL MESSENGER RNA
Recent developments in the chemotherapy of HIV infections 567
VIRAL PROTEIN MATURATION INHIBITORS
Recent developments in the chemotherapy of HIV infections 567
VIRUS BUDDING (RELEASE) INHIBITORS
Recent developments in the chemotherapy of HIV infections 567
VIRUS-CELL FUSION INHIBITORS
Recent developments in the chemotherapy of HIV infections 567
VISCOSITY OF BLENDS
Rheological and mechanical properties of poly(α-methylstyrene-co-acrylonitrile)/poly(methyl methacrylate) blends in miscible and phase separated regimes of various morphologies 1547R
VITAMIN B6 PHOSPHATE
Coenzyme B6 dependent novel bond cleavage reactions 9
VITAMIN D ANALOGS
Synthesis of novel vitamin D analogs 373
VOLTAGE-GATED ARTIFICIAL ION CHANNELS
Photo- and redox-active host assemblies 2359
VOLTAGE-REGULATED OPTICAL SWITCHES
Photo- and redox-active host assemblies 2359
WASTEWATER TREATMENT
Health risk assessment due to wastewater use in agriculture 2295
WASTEWATER USE IN AGRICULTURE
Health risk assessment due to wastewater use in agriculture 2295
WATER OXIDATION IN PHOTOSYSTEM II
A proposal for water oxidation in photosystem II 925
WATER RESOURCES PROTECTION
Strategies for sustainable development—experiences from a university cooperation in the Baltic Sea region 2263
WATER-SOLUBLE GUANIDINIUM RECEPTOR
Binding biomolecules with designed, hydrogen-bonding receptors 2371
WATER-STABILIZED ARC PLASMA TORCHES
Water-stabilized plasma generators 1157
WEATHERING OF MONUMENTS
Cultural heritage and the environment 2327
WHOLE LIFE CYCLE TESTS
Review of suggested testing methods for endocrine-disrupting chemicals 1805
WIDE-TEMPERATURE RANGE OBSERVATIONS
Wide-temperature range observations on reactions of metal atoms and small radicals 469
WITHANOLIDES
New natural products from medicinal plants of Pakistan 385
WORLD FOOD AND FIBER PRODUCTION
Calorimetry of plant metabolism: A means to rapidly increase agricultural biomass production 687
XENOBIOTICS
Neurotransmitters and the control of hypophyseal gonadal functions: possible implications of endocrine disruptors 1647
Breast cancer: evidence for xeno-oestrogen involvement in altering its incidence and risk 1713
XENOESTROGENS
Natural and Anthropogenic Environmental Oestrogens—an issue of special reports 1617
Neurotransmitters and the control of hypophyseal gonadal functions: possible implications of endocrine disruptors 1647
Breast cancer: evidence for xeno-oestrogen involvement in altering its incidence and risk 1713
X-RAY ABSORPTION SPECTROSCOPY
Electronic structure contributions to function in bioorganic chemistry: The blue copper active site 799
Radical copper oxidases, one electron at a time 903
Spectroelectrochemistry: A survey of *in situ* spectroscopic techniques 1395R
X-RAY CRYSTALLOGRAPHIC STUDIES
Structural bases for the catalytic mechanism of NiFe hydrogenase 25
Structural and biological properties of peptide nucleic acid (PNA) 105
Quantum crystallography, a technique for extending the concept of structure 319
Fermentation-derived compounds as a source of new products 335
Asymmetric synthesis using palladium catalysts 411
Recent results on structural chemistry of new natural products from Chinese herbal medicine 431
Structure-based inhibitor design for CDK2, a cell cycle controlling protein kinase 555
Main group elements in unusual coordination environments 765
Transition metal sulfur chemistry and its relevance to molybdenum and tungsten enzymes 889
Creating regular arrangements of nucleobases through metal ion coordination and H bond formation 977

© 1998 IUPAC

High rate deposition of thick epitaxial films by thermal plasma flash evaporation 1193
Computer modelling of microbial hydrolytic dehalogenation 1375
Spectroelectrochemistry: A survey of *in situ* spectroscopic techniques 1395R
Non-covalent synthesis of organic nanostructures 1459
Ion-pair extraction of metalloporphyrins into a mixture of acetonitrile with water 1925
X-RAY PHOTOELECTRON SPECTROSCOPY (XPS)
Plasma–surface interactions in the processing of III–V semiconductor materials 1181
Process control of organosilicon plasmas for barrier film preparations 1203
Supramolecular chemistry at interfaces 1985
X-RAY STRUCTURE DETERMINATION OF GALACTOSE OXIDASE
Mechanistic studies on the single copper tyrosyl-radical containing enzyme galactose oxidase 897
YEAST CHORISMATE MUTASE (YCM)
Yeast chorismate and other allosteric enzymes 527
YEAST-BASED ASSAYS
Review of suggested testing methods for endocrine-disrupting chemicals 1805
YLIDE FORMATION AND REACTIONS
New catalysts and methods for highly enantioselective metal carbene reactions 1123
YNOLS AND YNAMINES
Kinetics of proton transfer reactions involving carbon 2221
ZALCITABINE
Recent developments in the chemotherapy of HIV infections 567
ZEARALENONE
Metabolism and fate of xenoestrogens in man 1747
ZEEMAN EFFECT
Probing photochemical reactions with assistance of magnetic fields 827
ZIDOVUDINE
Recent developments in the chemotherapy of HIV infections 567
ZINC (II) DIALKYLDITHIOCARBAMATES AND DITHIOPHOSPHATES
Tetrahedral, oxtahedral, cubal and centered cubal dithiolate clusters and cages of Cu(I) and Ag(I) 839
ZIRCOCENES
New polyolefins by metallocene catalysts 1229
ZIRCONOCENE HYDRIDES
Kinetic vs. thermodynamic control in hydrozirconation reactions 1077
